

## USB Flex Light

Two LEDs provide task lighting for notebook computers

Part No.: **438858**

---

Shed more light on the subject.

The Manhattan USB Flex Light is ideal when working in darkened meeting rooms, airplane cabins and other low-light environments or using notebook computers without built-in lighting or backlit keyboards. The flexible gooseneck mount precisely directs the twin LED beam to help reduce eyestrain and minimize distracting others working nearby. Focus its light on a notebook computer back panel to help quickly connect cables, peripherals and accessories.

### Low Power Requirements and Bulb-Free Design

A dependable, bulb-free LED source with 100,000-hour life helps provide long, reliable service without an external power supply or electrical cords. It uses less than 90 seconds per hour of battery charge to minimize demands on portable power.

### Easy to Install and Transport

The Manhattan USB Flex Light is bus-powered and easily installs into any USB port or desktop/keyboard hub. Its lightweight, compact design easily fits in notebook computer cases, making it a practical mobile computing accessory.

### Features:

- Adjusts to gently illuminate a computer keyboard without disturbing others
- Ideal for airline cabins, meeting rooms, presentations and other low-light environments
- Efficient, bulb-free twin LED design provides extended life with minimal power consumption
- Easily installs in any USB port — no external power needed
- Lifetime Warranty
