1 Port PCI to CardBus PCMCIA Adapter Card

StarTech ID: PCI2PCMCIA1E

This innovative PCI PCMCIA adapter creates a PCMCIA port on your desktop computer - in other words, you save the cost of separate adapters that perform the same function on notebook and desktop computers!

With support for a broad range of CardBus/PCMCIA compliant cards, even if you don't use a notebook computer, the PCI PCMCIA adapter offers a convenient way to proactively add the functionality offered by CardBus cards to a desktop computer, without having to open the computer chassis multiple times for card installation.

The PCI PCMCIA adapter also offers a cost-effective peripheral swapping solution, allowing users to swap CardBus connected peripherals between desktop and laptop computers - a cost-saving solution that's quick and easy to install.

Applications

- Use laptop CardBus or PCMCIA cards on a desktop computer
- Use wireless broadband internet cards in rural areas without DSL or cable internet access

Features

- One Type II PCMCIA card slot
- Supports 16-bit PCMCIA and 32-bit CardBus cards
- No driver/software installation required

Technical Specifications

Warranty	Lifetime
Interface	CardBus (PCMCIA)
Ports	1
Bus Type	PCI / PCI-X (5 / 3.3V)
Card Type	Standard Profile
Chipset ID	ENE - CB-1410QF
Connector Type(s)	1 - PCI / PCI-X (Universal 3.3 & 5V; 32-bit) Male
External Ports	1 - PC Card (Type II; Cardbus) Slot
OS Compatibility	Windows 98SE/ ME/ 2000/ XP(32/64-bit)/ Server 2003(32/64-bit)/ Vista(32/64-bit)/ 7(32/64-bit)/ Server 2008 R2
Shipping (Package) Weight	0.2 lb [0.1 kg]
Included in Package	1 - PCMCIA/CardBus to PCI Adapter Card
Included in Package	1 - Instruction Manual
