

VGA Video Extender over Cat 5 Remote Receiver with Audio

StarTech ID: STUTPEALR

The STUTPEALR is the **receiver unit** utilized by our STUTPEA VGA and Audio over Cat 5 extension series. This convenient video distribution system simplifies implementing digital signage solutions by allowing a single VGA source and corresponding audio to be broadcast to multiple displays at up to 300m (950ft) away.

Comprised of one receiver unit per display, as well as a [4 port VGA & Audio extender unit](#) (ST124UTPEA) or an [8 port VGA & Audio extender unit](#) (ST128UTPEA), the VGA and Audio extension series can transmit a single VGA output and corresponding audio to four or eight displays/receivers over standard Cat 5 UTP cable.

For even more versatility, the [VGA & Audio over Cat 5 Line Splitter](#) (STUTPEA4X) can be used to multiply the number of potential displays by four - allowing the VGA signal and accompanying audio to be broadcast to up to 16 or 32 VGA displays.

Applications and Solutions

- Ideal for digital signage applications in financial, educational, and business sectors
- Place the display in a convenient viewing area, while the system equipment is placed elsewhere in a clean and secure environment
- Use digital signage to catch the attention of your audience and deliver up to date content the way you want it to be seen and heard.

Features

- Extenders (base units) are sold separately. Choice of using a four port or eight port extender
- Monitors can be up to 300m / 900ft away
- Send video and audio over Cat5 cabling to remote displays
