

Ultra-Portable Backup Drive with Capacity Meter

As a business professional on the go, it's important that you ensure the work you do on your netbook or notebook is secure and protected. And with a busy lifestyle, there's no time for the hassle and complexity of a traditional backup solution, and no room to carry an external hard drive and cables with you. Developed with this in mind, the Lexar® Echo MX backup drive is an easy-to-use, ultra-portable drive with capacity meter, which provides a convenient way to quickly and automatically back up and protect your files on the go. The drive is available in 8GB, 16GB, 32GB, 64GB, and 128GB capacities.

Automatically and Securely Back Up Files

Easy-to-Use, Automatic Backup Solution. Designed for netbook and notebook users, the Lexar Echo MX is a high-capacity, high-performance, flash-based backup drive that easily plugs into your system's USB port to provide automatic backup of your files. Built-in Lexar Echo backup software activates as soon as it's plugged in, to securely and automatically protect files with 128-bit AES encryption. The drive also performs ongoing backups to any files in use, and restores previously saved versions of a file—providing peace of mind that your data is safe. What's more, the software works across platforms with one seamless interface, allowing you to easily back up or restore files on either a PC or a Mac® system.

Quickly Back Up and Store More. The high-performance Lexar Echo MX backup drive comes in a range of high-capacity options—from 8GB to 128GB—so you can back up and protect large volumes of files and data on the go. And higher capacities offer higher performance—allowing you to quickly transfer large volumes of data with speeds up to 30MB/s read and 17MB/s write.* This means you can quickly protect and store more of the files that matter—great for your mobile lifestyle.

Check Available Storage Space at a Glance. In addition to its compact design with an integrated sleeve cap that reveals the USB connector, the Lexar Echo MX backup drive sports an easy-to-read, always-on capacity meter that lets you determine your available backup space at a glance, and maintains the reading even when disconnected—for ultimate convenience.

Lexar Performance, Quality, Compatibility, and Reliability. All Lexar memory card, card reader, and USB flash drive product designs undergo extensive testing in the Lexar Quality Labs, facilities with more than 800 digital devices, to ensure performance, quality, compatibility, and reliability. This provides customers with a high level of confidence when using Lexar products to capture, manage, move, and store the memories that matter.

Lexar offers a comprehensive line of innovative, award-winning memory products in several categories, including memory cards, card readers, DRAM, USB flash drives, and portable backup drives. With so many options, it's easy to find the right Lexar solution to fit your needs.

Lexar. When Memory Matters.™

*Speeds based on internal testing. Actual performance may vary. Security safeguards, by their nature, are capable of circumvention. Lexar does not guarantee data will be 100% secure from unauthorized access, alteration, or destruction.

Some of the listed storage capacity is used for formatting and other purposes and is not available for data storage. 1GB equals 1 billion bytes. For more information, go to www.lexar.com/capacity.

Product Highlights:

- Easily-accessible, ultra-portable backup solution
- Activates when plugged in, providing automatic, continuous backup
- High-capacity options to back up and store more files on the go
- High-performance—up to 30MB/s read and 17MB/s write*
- Securely encrypts files
- Easy-to-read, always-on capacity meter displays available backup space
- Convenient, reliable flash-based design
- Compatible with both PC and Mac® systems
- Five-year limited warranty

Capacities and Speeds:

- 8GB** (up to 28MB/s read, 10MB/s write)
- 16GB** (up to 30MB/s read, 13MB/s write)
- 32GB** (up to 30MB/s read, 17MB/s write)
- 64GB** (up to 30MB/s read, 17MB/s write)
- 128GB** (up to 30MB/s read, 17MB/s write)
