DL3™ Encrypted External Hard Drive

Easy Fast and Secure

Perfect for users who expect the best in speed, storage and security, the DataLocker DL3 secure external hard drive is simply secure. With advanced features like a rotating keypad, self destruct mode, lightening fast USB 3.0 connection and storage up to 2 Terabytes with SSD options, you'll never look at external storage the same way again.

Say goodbye to complicated software or drivers – all DL3 features are managed through easy to use touch screen technology. The rotating keypad prevents surface analysis for fingerprint or pattern examination and self–destruct mode wipes the encryption key after a customizable set number of failed password attempts.

The keypad features an alphanumeric, backlit, patented touchpad allowing you to set a strong password for ultimate security. Combine that with 100% hardware based 256–bit AES encryption, and you can rest assured your data is secured.

If you require additional peace of mind, DataLocker Link lets you electronically pair your DL3 to a specific computer – preventing your data from being accessed outside of your control (not available on Mac OS). Optional 2–Factor RFID based authentication gives you an added layer of protection by requiring 2 modes of authentication – your personal passcode plus a physical RFID tag.

Speed. Storage. And the ultimate in data security – all in the palm of your hands.

Unlock with RFID token (optional RFID 2 factor authentication)

About DataLocker

DataLocker is an innovative provider of encryption solutions. DataLocker products secure systems, media, external storage and cloud services for governments, military and enterprises around the world. Headquartered in Overland Park, Kansas, DataLocker devices combine superior convenience and usability with state of the art security. DataLocker is "Simply Secure." Rotating Keypad
(To Prevent Surface Analysis)

Rapid Secure Wipe Self-Destruct Mode
(Optional)

No Software or Drivers
Mac, Linux and Windows Compatible

Alpha Numeric Keypad
(For Strong Passwords)

USB 3.0 Interface
(USB 2.0 Compatible)
No External Power Required

Compatible with DataLocker EMP® (Encryption Management Platform) **to Manage Multiple Devices** available Q2 2015

* Screens Simulated

Features

Hardware based encryption – dedicated 256–bit AES XTS mode crypto engine

Two factor authentication via RFID card (optional)

All encryption, administration and authentication performed on the DL3 unit

Rapid key zeroization for secure redeployment

Self–destruct mode for protection against brute force attacks

Patented touchscreen display and user–friendly interface

Rotating keypad for mitigation of surface analysis and shoulder surfing

DL Link: Pair DL3 to allow access only on specified computers for added security (not available on Mac OS)

Virtual CD feature to mount an ISO disc image. The virtual drive will behave just like a physical CD/DVD drive.

Supports two roles: Administrator to set policy and recover data, User to access data

Strong password rule (non sequential, repeating, alpha + numeric, min 8 characters)

Multi–lingual user interface (English, French, German and Spanish)

Technical Specs

Capacities: 500GB, 1TB, 1.5TB, 2TB, 128GB SSD, 256GB SSD, 512GB SSD & 960GB SSD

Interface: USB 3.0 and 2.0 Compatible

Standards and Certifications: TAA Compliant, RoHS Compliant, FCC and CE, Manufactured according to ISO 9001:2000

Dimensions: 120mm x 80mm x 23mm (L x W x D)

Weight: Approximately 9 oz.

System Compatibility: Compatible with Windows, Mac, and Linux

Warranty: 1 year limited
