

Silver Seal™ Medical Grade Keyboard

Models SSKSV107, SSKSV107L and SSWKSV107

According to a University of North Carolina study, “25% of hospital keyboards harbor the Super Bug MRSA, but daily disinfecting of the keyboards could reduce the risk of cross contamination.” Now, the Association for Professionals in Infection Control and Epidemiology (APIC) includes “cleaning and disinfection of keyboards” for C. Diff prevention.

The SILVER SEAL™ washable keyboard has been developed to help prevent the spread of infections, including MRSA and C. Diff. The SILVER SEAL™ keyboard is 100% waterproof and can even be disinfected with bleach. As an added safeguard, it includes antimicrobial product protection. The combination of waterproof technology and antimicrobial product protection achieves the highest level of protection available in a true type keyboard today.

- 100% Waterproof (IP68 Rated)
- Silver Seal™ Antimicrobial Product Protection*
- True Type Laser Etched Keys
- 24K Gold-Plated connector
- Lifetime Warranty
- Available in Black or White

 **100% WATERPROOF** + **ANTIMICROBIAL PRODUCT PROTECTION**
