

Seal Pup Glow 2™ All-in-One Mini Waterproof Keyboard

Model S86PG2

According to a University of North Carolina study, “25% of hospital keyboards harbor the Super Bug MRSA, but daily disinfecting of the keyboards could reduce the risk of cross contamination.” Now, the Association for Professionals in Infection Control and Epidemiology (APIC) includes “cleaning and disinfection of keyboards” for C. Diff prevention.

The SEAL PUP GLOW 2™ washable keyboard has been developed to help prevent the spread of infections, including MRSA and C. Diff. The SEAL PUP GLOW 2™ keyboard is 100% washable and can even be disinfected with bleach. As an added safeguard, it includes antimicrobial product protection. The combination of washable technology and antimicrobial product protection achieves the highest level of protection available in a true type keyboard today.

- New Design With Backlit Keys
- 100% Waterproof
- Silver Seal™ Antimicrobial Product Protection
- Quick Connect™ Cable
- Seal Cap™ (Patent Pending)
- Built-in Seal Touch™ Touch Pad
- Patent Pending
- Limited Lifetime Warranty
