

# 4600L 46" Interactive Digital Signage Touch Display

## The 46-inch 4600L is part of a new family of touch displays which bring interactivity to digital signage.

The EloTouchSvstems 4600L features a choice of industryleading touch technologies that optimizes the touch experience for a particular usage. For a seamless, zerobezel design, the innovative Acoustic Pulse Recognition (APR) touch technology delivers an elegant appearance and a responsive touch experience. Elo zero-bezel APR technology recognizes touch on virtually the entire display surface, offering a full-screen interface for navigation regardless of how the display is touched-finger, prosthetic, stylus, card or pen. For a sensitive, accurate touch response, IntelliTouch surface wave product technology utilizes pure-glass construction to deliver excellent imagery with high light transmissions, not affected by changes in ambient light, and supports finger, gloved hand and soft stylus activation. Housed in a highly durable steel chassis for a long-life of reliable performance, the 3200L with either technology is an efficient display canvas for almost any commercial, public access application

Optional high performance computer modules are wellsuited for running interactive media and are available with a choice of two processing models: ECM1 with the Intel Celeron Dual-Core 2.2GHz and ECM2 with the Intel Core 2 Duo 3.0GHz. The computer modules are fieldinstallable, easily sliding into a dedicated bay behind the touch display and locking into place with two thumbscrews. These modules make the 4600L a reliable platform that is interoperable with content management servers and support optimal partitioning of locally cached and network stored content.

## Benefits

- Edge-to-edge glass design facilitates easy care and cleaning, plus dust and liquid resistance with APR
- IntelliTouch surface wave delivers a sensitive, accurate, touch experience for finger, soft-stylus activation
- Power and display control functions can be locked out to prevent tampering
- Built-in speakers provide audio expansion capabilities
- Pure-glass construction to deliver excellent imagery, high light transmissions; not affected by variations in ambient or extreme light.
- Features durable, scratch-resistant glass for continuous surface performance
