

Suitable for pole & flush mounted projectors

Max weight capacity 22.7kg (50lbs)

Suits suspended ceiling structures

Allows alignment/focus adjustment

The Telehook 8" and 24" Ceiling Tiles are designed to assist with the mounting of projectors into a suspended ceiling; providing a safe and secure attachment point, improving the finished appearance, and enhancing cabling / connection option. PT24 is designed to slot directly into a 24" grid as a replacement tile while the PT8 is designed to be hidden above alternative grid configurations and ceiling types. Both are compatible with the Telehook Flush and Pole mounts, as well as 3rd party mounts which conform to the US 1.5" NPT standard. The tiles come with attachment hardware to suit a variety of roofing structures and feature removable panels for connector block / socket socket installation. Depending on the installation orientation they can enable fine adjustment for either focal length or screen alignment.

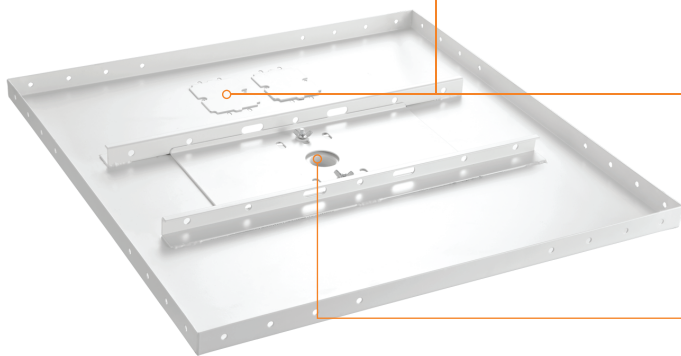

Product key features:

- Designed to be used with Atdec Telehook and third party projector mounting solutions
- Suit standard 8" and 24" tile matrix configurations
- Can be also used with non-standard tile configurations and ceiling types (PT8 only)
- Removable panels allow for connector block / plug mounting
- Supplied with mounting hardware to suit timber, concrete and truss beam ceiling supports
- Gloss white finish which can be painted if required
- Supplied with a security / safety tie
- Supplied with an installation guide

Removable panels allow for connector block mounting

Available in two sizes; 8" (TH-PT-8) and 24" (TH-PT-24)

Allows focal length / alignment adjustment

Also compatible with standard 1.5" NPT mounts

Compatible with Telehook TH-WH-PJ-FM and TH-WH-PJ-CM mounts
