

## DR-EX61IP

Headphones for iPod® & iPhone®

The perfect combination: Sony audio performance meets control for iPod®, iPhone®, and iPad®.<sup>1</sup> The DR-EX61IP in-ear headset mixes form with function and control. The in-line remote provides track and volume controls while the built-in microphone lets you take calls on the go.

### In-line remote control

Use the in-line remote control to navigate your iPod® library - skip tracks and keep the volume under control - without ever taking your player out of your pocket.<sup>1</sup>

### Mic'd to go

Take calls on the go with the in-line microphone for iPhone®. Answer calls easily while your phone stays safely tucked away. When the conversation is over, go right back to enjoying your music.

### VoiceOver support

The simple press of a button activates VoiceOver mode where the iPod® states the name of the currently playing song or playlist (on enabled devices).

### Sound story

The DR-EX61IP headphones deliver dynamic audio reproduction in a lightweight and comfortable in-ear design. 9 mm driver units combined with 400 kJ/m<sup>3</sup> high power neodymium magnets produce crystal clear sound.

### Secure Fit

4 sizes of included hybrid silicone earbuds help maximize sound quality and comfort.

## Specifications
