

E 461 - BM

A New Level of Clarity

Main Features

- **Neodymium magnet drivers** - ensures rich frequency response for precise details
- **6 Interchangeable silicone caps** - provide snug fit to every ear and seal out noise
- **Single button in-line remote** - for music playback and voice control
- **Full-bodied bass** - hardened aluminum capsule guarantees absolute linearity in lower bass
- **Light weight**

The **E461-BM** is a new symbiosis of value and performance for the PC ear phone market, offering remarkable style and audio quality that simply needs to be experienced.

James Vozar

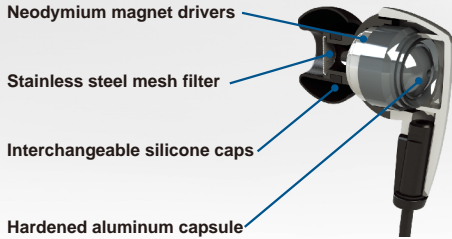

E461-BM

A New Level of Clarity

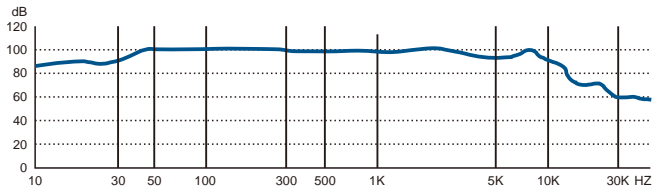

The **E461-BM** professional earphones are precision-engineered to reveal the full sound of today's digital music. With its advanced design, it delivers an unprecedented combination of deep bass, smooth undistorted highs, and clear vocals never heard before from earphones in this price range.

Specifications	
Frequency Response	17 Hz – 26 KHz
Impedance	12
Sensitivity	96 dB/mW
Cable	1.3 m with 3.5 mm plug (for earphone and microphone)
Weight	14 g

Bass	○○○○○○○○○○
Linearity	○○○○○○○○○○
Clarity	○○○○○○○○○○●●
Noise isolation	○○○○○○○○○○
Comfort	○○○○○○○○○○

Linearity
A flat frequency-response curve shows that E461-BM is equally sensitive to all frequencies. No frequencies would be exaggerated or reduced, resulting in a more accurate representation of the original sound.

Package Contents
1 x E461-BM earphones / 2 types of silicone caps in 3 different sizes (S , M , L)
1 x travelcase / 1 x silicone cable winder / 1 x cable splitter / 1 x cable clip
