PRO 300

MSRP: \$199.95

NOTE: This product is available in Ivory White, Racing Blue and Piano Black. All the product color images are included in the zip file above

Just because you travel light doesn't mean you have to compromise on your music. The PRO 300 gives you the best of both worlds – portability and power. Its sleek, lightweight design is perfectly matched with a bold, precise and vibrant sound.

Features

If You Love Music, Listen to the PROs

As the world's largest musical instrument manufacturer and the leading choice of professionals for studio and concert gear, Yamaha knows better than anyone how to make your music sound its absolute best. Now you can enjoy the Studio Sound experience anywhere you go. PRO Series headphones go beyond just "powerful bass" to authentically reproduce any style of music. From Classic Rock to Hip-Hop, from Latin Jazz to Delta Blues, the PRO Series brings all your music to life. Your collection is waiting...

Outstanding Audio Quality

The PRO 300 headphones combine the finest materials with Yamaha's legendary tuning know-how to deliver a superb listening experience. They incorporate a newly-developed Yamaha-proprietary driver design with neodymium magnets that provide maximum efficiency when used with mobile devices such as smartphones, tablets and other portable music players. The ear cushions offer excellent acoustic properties by way of meticulous attention to material selection and shape design. From deep, tight bass to clear, precise mids and highs, the PRO 300 reproduces music authentically, with a lifelike soundstage.

Exceptional Comfort and Durability

Built to handle the rigors of everyday use without wearing you down, the PRO 300 features an adjustable, reinforced headband with ample padding textured for a pleasant feel. The band is shaped to apply just the right amount of pressure – snug enough to provide some noise isolation, yet light enough for long listening sessions. Its ear cushions are extraordinarily soft and smooth, with a feel so natural you'll never want to take it off.

Fuel-injected Design

Drawing inspiration from the world's finest musical instruments and motorcycles, the PRO Series headphones get your heart racing before you even plug them in. Gorgeous geometry and ultra-clean design curves are matched with premium color and finish materials, then emblazoned boldly with Yamaha's iconic tuning-fork marquee, conjuring the power and energy of our high-performance supersport bikes. The PRO 300 is available in three stunning designer color choices.

Frustration-free Connectivity

Not all headphone cables are created equal. The PRO 300 uses a tangle-resistant flat cable made from a material that is both durable and designed to reduce "touch noise" transfer effects. An ideal length for mobile use (4 ft), it attaches directly to a single earcup, keeping it out of your way. The flat construction separates the internal cores to minimize interference and terminates to a low-profile right-angle connector. A gold-plated ¼" adapter is included in the box for connecting to professional-grade audio equipment.

Control at Your Fingertips

The PRO 300 cable includes an in-line remote/mic optimized for use with Apple iPod, iPhone and iPad devices. The "+" and "-" buttons control volume for both music and phone calls, while the center button allows you to play/pause music, skip to the next song, skip to the previous song, or answer/end phone calls. The controller buttons provide a tactile click-response, enabling intuitive operation without need for visual reference. For non-Apple devices, control behavior varies due to differences in applications and pin configurations.

applications and pin configurations.

Bring it With You...Everywhere

The PRO 300 offers a hinged headband that allows it to fold into a compact size for traveling. It also comes with a Yamaha soft carrying case for added protection.
