Grab your passport, grab your camera and go!

There are over 60 million Americans with a passport, and for those of them who make it a point to take great photos of their adventures, the COOLPIX S9100 is the ideal camera for them. It's an exceptionally ideal choice for the sophisticated traveler who wants incredible images at inspiring locations—yet desires an easy to use and carry camera. The Nikon COOLPIX S9100 features innovative Nikon technology like a 12.1 megapixel CMOS sensor that delivers great image quality even in low light conditions. Adding to its distinctive appeal is the ability to compose and view images on the three-inch, 921,000 dot ultra-high resolution monitor. It boasts an astonishing 18x wide-angle optical Zoom-NIKKOR ED glass lens—providing flexibility for wide-angle coverage shots to a telephoto with ease. Integrated Scene Modes including Easy Panorama, Advanced Night Portrait Mode and Night Landscape help nighttime photos shine with brilliance. Full 1080p HD movie recording in a single touch adds real life excitement to expeditions. Special effects modes like Selective Color, Monotone and Sepia lets your jet-setting customers get creative for more dramatic results. The Nikon COOLPIX S9100...it's the ideal solution for those who want to travel lightly and capture brilliantly.

The camera that says "Grab your passport and go!"

The new COOLPIX S9100 is loaded with innovative Nikon technology like a 12.1-megapixel CMOS sensor that assures superb image quality, even in low-light conditions. Optimized with Nikon's exclusive EXPEED C2 processing engine, the backside-illuminated CMOS sensor delivers natural looking pictures with exceptional detail. Composing images on the large three-inch Clear Color Display is easy. This dazzling 921,000-dot, ultra-high resolution display makes viewing photos and HD movies instantly gratifying.

Whether people watching in Paris or waiting for just the right light to hit the Grand Canal in Venice, the COOLPIX S9100's High-Speed Shooting feature captures five photos in approximately one second at full resolution. And Subject Tracking keeps the camera automatically fixed on any moving subject, ensuring sharp focus.

With a 1.4-inch slim-body design and a weight of just 7.6 ounces, the COOLPIX S9100 travels the world with ease and style.

Precision camera optics from Nikon. Again.

Producing precision camera optics is at the heart of Nikon's proud photographic heritage. The COOLPIX S9100 continues the legacy with a high quality 18x wide-angle optical Zoom-NIKKOR ED glass lens that offers impressive telephoto coverage (25-450mm) with outstanding color capture and razor-sharp results. This is the only lens needed for exacting portrait studies, scenic panoramas and challenging compositions. Plus, we realize that shooting from the roof of an SUV, a gondola overlooking the Swiss Alps or a whale-watching boat in Iceland can get bumpy. That's why we've included a five-way, Hybrid VR Image Stabilization system with the COOLPIX S9100. It uses sensor shift in combination with electronic stabilization features to minimize the effects of camera shake—and to minimize unwanted streaky or blurred images.

Panoramas? Night shots? Special scenes? No challenge for the COOLPIX S9100.

Travelers, adventurers and vacationers are grabbing their cameras, regardless of shooting conditions. That's why the COOLPIX S9100 is loaded with advanced features to match. It's ideal for sunsets, night scenes and countless other travel images. Choose among 19 Scene Modes or with Scene Auto Selector, the camera automatically selects the most appropriate one. Plus, Easy Panorama

Mode allows them to pan the camera in any direction as it automatically creates one seamless panoramic image.

Nikon's Advanced Night Landscape lets shooters capture quality images at night easily. It shoots a series of consecutive shots taken at a fast shutter speed and composes them into a single, brilliant image. Night Portrait takes outdoor portraits against bright backgrounds and combines multiple shots to capture the essence of night scenes. And, the COOLPIX S9100's Backlighting HDR automatically provides optimum exposures when shooting backlit subjects.

One-touch HD movie recording adds another dimension to global adventure travel.

Globetrotters, international travelers and family vacationers love to share their adventures on the Internet for their friends and relatives to see. The COOLPIX S9100 lets them do just that—in Full HD (1080p). This versatile camera will capture countless memorable still images that are easily printed and saved, but its moviemaking features bring a safari, ski trip or balloon ride to life. One-Touch of the movie recording button and the COOLPIX S9100 will shoot 1080p HD movies complete with stereo sound. Plus, optical zoom and auto focus functions pull up close to the action. Shooters can capture still images while recording movies—and they can experiment with special effects like fast or slow motion³. When the time comes to share movies, the in-camera playback feature and convenient HDMI-CEC output make it effortless to hookup to an HDTV or computer.

In-camera special effects that don't require post-shot processing.

There is no need for post-shot processing with the COOLPIX S9100's in-camera special effects. They let world travelers and family vacationers take the kind of photos and movies they've never considered before. Shooters can recreate the look of yesteryear with the Nostalgic Sepia effect, or they can experiment with intricate black and white shooting using the High-Contrast Monochrome feature. This versatile camera also highlights bright areas of a photo with the High Key effect, or brings out dark areas with Low Key mode. Selective Color boosts the vibrancy of specific aspects of a photo or movie, while a Soft Effect subdues harsh elements for a gentler, silkier look. The COOLPIX S9100 even has a Creative Slider to adjust the brightness, intensity and hue of an image.

Specifications:

- **Focus Range (from lens)** 1 ft. 8 in. (50cm) to infinity (∞), Macro close-up mode: 1.6 in. (4cm) to infinity (∞)
- **Storage Media** Internal memory (approx. 74 MB), SD/SDHC/SDXC memory card²
- **ISO Sensitivity** ISO 160, 200, 400, 800, 1600, 3200, Auto (auto gain ISO 160-800), Fixed range auto (ISO 160-400), High-speed continuous (ISO 160-3200).
- **Power Sources** Supplied: Rechargeable Li-ion Battery EN-EL12, Charging AC Adapter EH-69P
Optional: AC Adapter EH-62F, Battery Charger MH-65.
- **Battery Life**¹ Approx. 270 shots with EN-EL12 battery.
- **Dimensions (WxHxD):** Approx. 4.2 x 2.5 x 1.4 in. (104.8 x 62.0 x 34.6mm) excluding projections⁴
- **Weight:** Approx. 7.6 oz. (214 g) with battery and SD memory card⁴

¹Based on CIPA industry standard for measuring life of camera batteries. Measured at 73°F (23°C); zoom adjusted with each shot, built-in flash fired with every other shot, image mode set to Normal.

²Not compatible with Multi Media Cards (MMC C).

³Setting is available only for image sizes of 3M (2048 x 1536) or smaller.

⁴Method of noting dimensions and weight is in accordance with CIPA DCG-005-2009 guideline.
