- Carabiner & stopper made of plastic (no metal parts are used to prevent rust)
- Available in 3 different colors: red, blue & black

## Universal Tough Camera Case

This case is a premium carrying case for all Olympus Tough models. It is made of a thick, yet soft, silicone rubber body with a neoprene upper part to close the case with an adjustable stopper. The sleek design and the used materials protect your device from bumps, drops and scratches both on land and in water. The mesh design allows quick draining and accelerates the drying process by letting air through the silicone. The attached belt loop and carabiner give you all the flexibility you need to use your camera anytime without worrying where to put the case. And as no metal parts are used in this case, rust is absolutely no issue. This case is the perfect companion for all outdoor enthusiasts and comes in three different colors (red, blue, black).
