ABBYY FineReader Pro for Mac

The ultimate in OCR for Mac

What is FineReader Pro for Mac?

ABBYY FineReader Pro for Mac is the most accurate OCR for OS X. FineReader turns scans, PDFs and digital photos into editable files in your choice of format, while preserving all original text and layouts – so no more retyping or reformatting of documents. Plus, an intuitive menu makes complex tasks simple! It's professional OCR the easy way, just as it should be on your Mac.

Raises productivity for every Mac user, including…

Students and educators can extract content from paper and turn it into editable text for instant use in reports, research papers, lessons and presentations. Sharing information becomes far easier, too.

Legal professionals save time by digitizing documents that need to be edited, shared, reused in presentations, or signed digitally. Plus, searchable digital documents speed E-Discovery and more.

Sales and marketing personnel can easily repurpose content from proposals and previous communications for use in brochures, leaflets, emails, ads and other collateral.
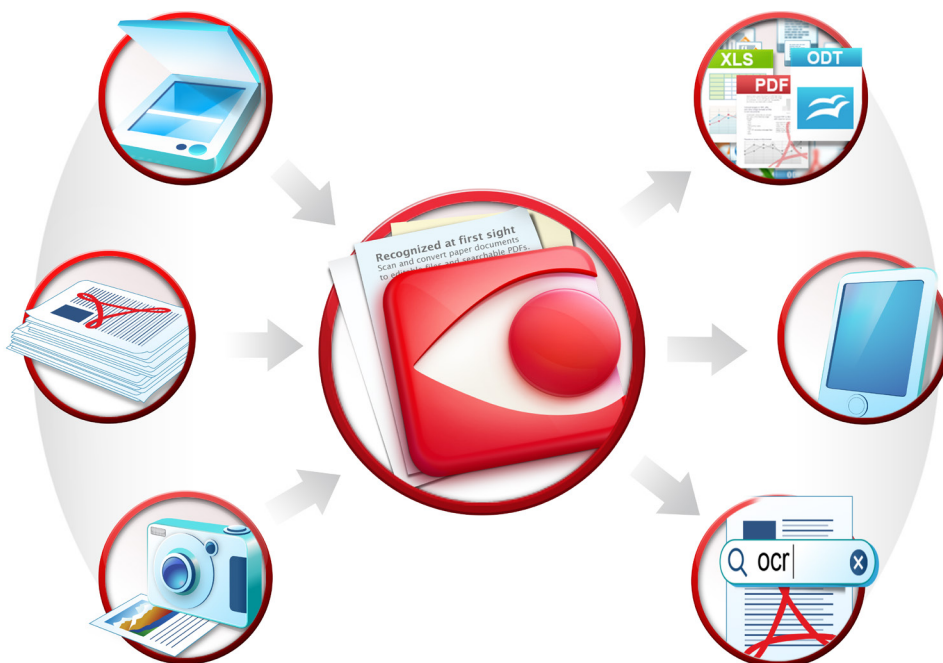

Scientists and researchers can gather data and create reports faster, by quickly extracting data from paper and previously scanned documents for quoting and archiving.

Healthcare professionals can quickly create searchable PDFs for easy storage, retrieval and sharing.

Home users can eliminate clutter by digitizing paper tax records, receipts, financial statements, recipes, etc.

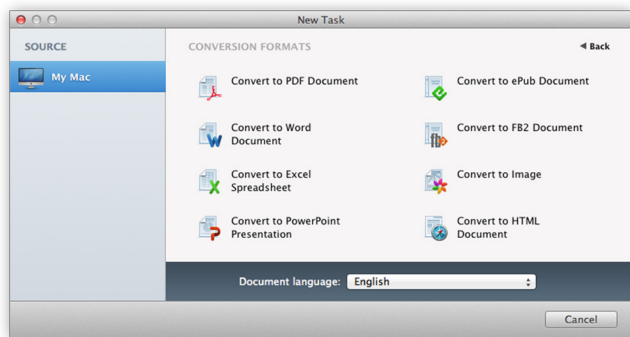

KEY BENEFITS

- **Highest OCR accuracy for OS X**
  Say goodbye to retyping. FineReader recognizes and converts text from paper documents with up to 99.8% accuracy.*

- **Breakthrough intelligent recognition**
  Forget manual reformatting. Adaptive Document Recognition Technology (ADRT) precisely reconstructs original layouts.

- **Productivity-boosting ease**
  Zero learning curve. Intuitive interface and Quick Tasks make complex jobs easy. Section 508 compliance means equal ease for all.

- **Guaranteed compatibility**
  Seamlessly supports your favorite productivity solutions. Works with everything from iWork to open source applications.

- **Better collaboration**
  Quickly turn paper into editable digital documents that can be commented upon and then shared with colleagues.

- **Perfect for PDFs**
  FineReader creates searchable and editable PDFs and PDF/A files for long-term archiving.

- **Ideal for foreign languages**
  Automatically recognizes over 180 languages and in any combination of languages.

Features

Every feature is easy to use and access

A single intuitive interface lets you scan, import and convert documents into your choice of editable formats with remarkable accuracy and ease.

Your complete solution for converting, reusing and sharing content

Scan and open any document or file

- Scan paper documents straight from within FineReader.
- Import digital photos from your smartphone.
- Open PDFs of any type including password-protected

Convert to editable documents

- Create editable copies of paper and image-only documents.
- Instantly send results to the application of your choice: Apple Pages, Numbers, Apache OpenOffice.org® Writer, etc. or save to the preferred format.
- To help with proofing, set FineReader to highlight words in converted documents that may not have been recognized correctly.

Create searchable PDFs

- Turn paper and image-only PDFs into fully searchable PDF files that are easily retrieved, shared, edited and annotated.
- Save to the PDF/A file format for long-term archiving.
- Add PDF properties, assign passwords to protect PDFs, create outlines for fast navigation and more.

Make your own e-books

- Scan books, magazines and articles and save them as fully formatted ebooks.
- Supports popular EPUB® and FB2 formats

Scan with smartphones and digital cameras

- FineReader extracts text from photos taken with your smartphone or digital camera and converts them into your choice of editable formats.
- Sophisticated image pre-processing tools automatically correct the images for best results.
- Manually edit images with Image Editor tool.

Easily pull quotes

- Easily extract a portion of recognized text from scans or files from within FineReader. Simply highlight and click the text you want to quote and FineReader extracts it – no need to convert the entire document first.

Share and collaborate

- Send converted documents as email attachments from within FineReader.

Enable text-to-speech

- Makes unsearchable documents available for voiceover by text-to-speech applications by converting them to searchable formats.
- Enables visually impaired users to access books, papers, articles, lessons, etc.

System Requirements

- A Mac computer with an Intel processor
- Operating System: Mac OS X Lion 10.7, Mac OS X Mountain Lion 10.8, and Mac OS X 10.9 Mavericks
- Memory: 1024 MB RAM
- Hard disk space: 1.5 GB for typical program installation and 1 GB for program operation
- Supported with Image Capture application (ICA) scanners and MFPs (see the list on the Apple web-site: http://support.apple.com/kb/ht3669), cameras and smartphones
