

## HI-GAIN™ DUAL-BAND WIRELESS-AC USB NETWORK ADAPTER

- Complies with draft IEEE 802.11ac standard and backward compatible with wireless 802.11a/b/g/n standards
- Dual-band wireless connectivity for 2.4GHz or 5GHz
- Supports Windows XP/Vista/7/8/8.1 and \*Mac OS X 10.5+
- Hi-Gain External Antenna: 4dBi (2.4GHz) and 6dBi (5GHz), provides high performance long distance wireless connections
- Supports WMM wireless QoS feature
- Features a hardware WPS (Wi-Fi Protected Setup) button for easy wireless connections

Efficiency. Connectivity. Portability. Hawking Technology's HD65U Hi-Gain external antenna adapter is not only packed with Hi-Gain technology, it also supports the latest in Wireless-AC and Dual-Band technology. With this adapter, high definition content is readily available in an instant, downloading speed is faster and more stable, and streaming movies becomes instantly more enjoyable without annoying buffering and lag. Don't settle for conventional wireless, guarantee a strong, stable connection and networking mobility with the HD65U. The external antenna is flexible up to 180° to maximize your Wi-Fi reception. Slim USB format ensures that the device is not only portable but compatible with all of your networking devices. Convert any wi-fi enabled 2.4GHz device with a USB port to the 5.0GHz standard! The HD65U is perfect for getting that extra distance for all your Wi-Fi devices!

Use the HD65U anywhere that your Wi-Fi device is suffering from weak wireless signal strength. Simply plug the USB adapter into an available port, run the setup and connect to an existing network. Bring your wireless outside, to that far spare bedroom, your upstairs loft, or the cafe downstairs. The options are endless!
