

EliteBook 8460p Notebook PC

Corporate Elite

HP's premier business notebook with a new professional design, 14.0-inch diagonal HD¹ display, new Intel technology, choice of graphics and industry-leading battery life.⁶

HP recommends Windows[®] 7.

Enhanced performance and graphics

Create documents, presentations and spreadsheets and quickly share them with co-workers. The new Intel architecture features 2nd generation Intel[®] Core[™] i7,² quad-core processors, i5² and i3² dual-core processors, offering incredible performance, responsiveness and enhanced graphics.

Choose Intel[®] HD Graphics 3000³ for responsive performance and rich media capabilities. Alternatively, choose AMD Radeon[™] HD 6470M discrete graphics for an amazing visual experience with powerful performance.

All-new professional design in a platinum color

Designed to meet tough military standards (MIL-STD 810G for drop, vibration, dust, humidity, altitude and high temperature),²⁶ the HP EliteBook p-series is the culmination of creative design and precision engineering. The professional series' aerospace-inspired HP DuraCase is presented in its signature platinum color with a timeless bead-blast finish and a precision aluminum-alloy hinge. Every aspect of the HP EliteBook 8460p — from its architectural form to its rich metal finishes — communicates class and professionalism.

Expand your view

The HP EliteBook 8460p features an easy-to-view 14.0-inch diagonal HD display and supports up to four concurrent displays⁷ with AMD Eyefinity Technology.

Built to conserve

HP Power Assistant⁴ extends battery run time while reducing energy consumption. It is an integrated solution that measures and logs reported system energy usage through a simple interface.

Built to simplify

With HP QuickWeb⁵ you can tap into fast, convenient and more secure access to the internet, email, contacts and calendar all at the touch of a button and without long boot-up times.

The HP EliteBook 8460p offers extended battery run-time and multiple battery solutions for both lightweight and extended battery life configurations.⁶

Common docking options⁷ allow professionals to share docking solutions in various locations.

1. HD content required to view HD images.
2. 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information. Quad Core is designed to improve performance of multithreaded software products and hardware-aware multitasking operating systems and may require appropriate operating system software for full benefit. Not all customers or software applications will necessarily benefit from use of this technology. Intel's numbering is not a measurement of higher performance.
3. Intel HD 3000 not available with Celeron processors. Celeron configurations feature Intel HD graphics.
4. Power calculations and cost calculations are estimates. Results will vary based on variables, which include information provided by the user, time PC is in different power states (on, standby, hibernate, off), time PC is on battery or AC, hardware configuration, variable electricity rates and utilities provider. HP advises customers to use information reported by HP Power Assistant for reference only and to validate impact in their environment. Environmental calculations were based on U.S. EPA eGrid 2007 data found at www.epa.gov/egrid/. Regional results will vary. Microsoft Windows required.
5. HP QuickWeb is accessible when the notebook is off in Windows based systems. Internet access is required. Timing may vary depending on the system configuration. To enable the feature following the removal of the battery, reboot the notebook prior to subsequent use.
6. Battery life will vary depending on the product model, configuration, loaded applications, features, use, wireless functionality and power management settings. The maximum capacity of the battery will naturally decrease with time and usage. See MobileMark07 battery benchmark www.bapco.com/products/mobilemark2007 for additional details.
7. Sold separately or as an optional feature.
8. This system may require upgraded and/or separately purchased hardware to take full advantage of Windows 7 functionality. Not all features are available in all editions of Windows 7. See <http://www.microsoft.com/windows/windows7/> for details.
9. Certain Windows Vista product features require advanced or additional hardware. See www.microsoft.com/windowsvista/getready/hardwarereqs.msp. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit www.windowsvista.com/upgradeadvisor.
10. Maximum memory capacities assume Windows 64-bit operating systems or Linux. With Windows 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.
11. Microsoft Windows required.
12. Intel® Turbo Boost 2.0 technology requires a PC with a processor with Intel Turbo Boost 2.0 capability. Intel Turbo Boost 2.0 performance varies depending on hardware, software and overall system configuration. See www.intel.com/technology/turboboost/ for more information.
13. Some functionality of Intel vPro, such as Intel Active management technology and Intel Virtualization technology, requires additional 3rd party software in order to run. Availability of future "virtual appliances" applications for vPro technologies is dependent on 3rd party software providers. Compatibility with future "virtual appliances", Microsoft Windows Vista and Windows 7 operating systems is yet to be determined.
14. Fast Charge Technology recharges your battery up to 90% within 90 minutes when the system is off. Fast Charge Technology does not apply to the HP Ultra-Capacity or 9-cell batteries. When the PC is powered on, charge time may increase and will vary based on the workload of the notebook PC.
15. For hard drives, GB = 1 billion bytes. Up to 10 GB (for Vista) or 15 GB (for Windows 7) of system disk is reserved for the system recovery software.
16. As HD DVD is a new format containing new technologies, certain disc, digital connection, compatibility and/or performance issues may arise, and do not constitute defects in the product. Flawless playback on all systems is not guaranteed. In order for some HD-DVD titles to play, they may require an HDMI digital connection and your display may require HDCP support. Blu-ray disks cannot be played on this drive. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 GB Double Sided – Version 1.0 media. Actual speeds may vary. Don't copy copyright-protected materials. Double Layer discs can store more data than single layer discs; discs burned with this drive may not be compatible with many existing singlelayer DVD drives and players. LightScribe creates a monochrome image. LightScribe media required and sold separately.
17. Internet access required.
18. Wireless use requires separately purchased service contract. Check with your local vendor for coverage area and availability in your area. Connection and speeds will vary due to location, environment, network conditions, and other factors.
19. Wireless access point and Internet service required. Availability of publicwireless access points limited.
20. Includes reduced functionality versions of Word and Excel. Purchase of Product Key required to activate full Office 2010 suite available at participating resellers/retailers and www.office.com.
21. For the use cases outlined in the DOD 5220.22-M Supplement.
22. Internet access required. This product may include Norton or McAfee software. First 60 days included. Subscription required for live updates afterward.
23. The Computrace agent is shipped turned off, and must be activated by customers when they purchase a subscription. Subscriptions can be purchased for terms ranging from one to four years. Service is limited, check with Absolute for availability outside the U.S.
24. Blu-ray is a new format containing new technologies, certain disc, digital connection, compatibility and/or performance issues may arise, and do not constitute defects in the product. Flawless playback on all systems is not guaranteed. In order for some Blu-ray titles to play, they may require an HDMI digital connection and your display may require HDCP support. HD-DVD disks cannot be played on this drive. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 GB Double Sided – Version 1.0 media. Actual speeds may vary. Don't copy copyright-protected materials. Double Layer discs can store more data than single layer discs; discs burned with this drive may not be compatible with many existing singlelayer DVD drives and players. LightScribe creates a monochrome image. LightScribe media required and sold separately.
25. Service levels and response times for HP Care Packs may vary depending on your geographic location. Service starts on date of hardware purchase. Restrictions and limitations apply. For details, visit www.hp.com/go/lookuptool.
26. MIL-STD-810G testing was not intended to demonstrate fitness for U.S. Department of Defense contracts or for military use. Test results are not a guarantee of future performance under these test conditions.
27. Intel AT security requires a separately purchased Absolute Computrace service subscription and must be activated and configured. Check with Absolute for availability in your country. Intel and HP assume no liability for lost or stolen data and/or systems or any other damages resulting therefrom. See <http://www.intel.com/technology/anti-theft/>.
