

HP EliteBook 8440p Notebook PC

Corporate Elite

Empower your business with the new standard for mobile productivity and business ruggedness with a notebook that passes rigorous military standard testing.

Windows®. Life without Walls™. HP recommends Windows 7.

A new standard

Take along the business notebook that's durable without weighing you down. Starting at 2.08 kg and featuring a 35,6 cm (14.0") diagonal LED-backlit HD display and industry-leading battery life with up to 24 hours on a properly configured HP EliteBook 8440p with Ultra Capacity Battery. This notebook is designed to meet the tough military standards (MIL-STD 810G) for vibration, dust, humidity, altitude and high temperatures.

Make choices

Intel® Core™ i7 and Intel® Core™ i5 processors deliver intelligent technology for outstanding performance on the most demanding tasks. Choose between integrated or discrete graphics with dedicated video memory for more graphics intensive environments.

Make connections

Connect to other devices in a snap. With DisplayPort, you get sharper, deeper images compared to other display connector technology. And an eSATA connector lets you connect optional external RAID array, hard drives or optical drives for fast and easy storage.

Keep moving

Integrated HP Mobile Broadband allows you to conveniently access the internet and e-mail in more places. The Global Positioning System (GPS) uses satellite-based technology to determine your 3D position (latitude, longitude and altitude).

HP Professional Innovations help you focus on your business

Built to last: with HP DuraCase, which includes a magnesium display enclosure and magnesium alloy chassis, you get a durable device that has been tested at extreme temperatures.

Built to simplify: HP QuickLook 3 provides read and write capability of email, calendar, task and contact information in seconds at the touch of a button, without having to boot up.

Built to conserve: HP Power Assistant measures and logs reported platform energy usage and delivers comprehensive reporting (time, watts, energy cost and carbon footprint).

THE
COMPUTER
IS PERSONAL
AGAIN.
