

## HP 3125 Notebook PC

Small notebook. Big performance. In a class all its own.

**A small yet powerful notebook that's ideal for students.**

### HP recommends Windows 8.

#### Designed with mobility in mind

With an eye-catching modern design, you'll enjoy carrying your HP 3125 to classes and meetings. With a starting weight of just 3.52 lbs (1.6 kg),<sup>11</sup> this ultraportable notebook helps you stay on top of your game. Packed with amazing battery life and Windows 8,<sup>7</sup> the affordable price may surprise you. Enjoy up to 9 hours of battery life<sup>14</sup> that keeps up with your busy schedule. Unlike other highly mobile devices, the HP 3125 has a replaceable battery so you can easily swap it out and get back to work.

#### Equipped for education

Knock out assignments with this small, yet powerful notebook that's ideal for students. The HP 3125 is optimized for Windows 8,<sup>7</sup> giving students and staff a familiar PC experience. The HP 3125 features a 97% full-size keyboard and an 11.6" diagonal LED-backlit HD display,<sup>12</sup> giving you ample screen space to research subjects, edit documents, and create presentations. Plus conveniently use the touchpad with multi-touch gesture support to navigate your screen.

Rely on the latest AMD processor and chipset to power through assignments and tough deadlines. Add polish

to your presentation with impressive graphics created with AMD Radeon HD<sup>2</sup> Graphics.

#### Collaboration beyond walls

Connect with people worldwide with the HP TrueVision HD webcam.<sup>12,13</sup> Thanks to built-in HP Beats Audio™ and dual speakers, the HP 3125 is designed for the best sounding, richest audio available on a PC. With integrated WLAN,<sup>9</sup> be confident that you're online when you need to be without tying you down to cords.

#### The security to work wherever you go

Your data stays protected from accidental bumps and bruises. HP ProtectSmart senses when your PC moves and locks your hard drive to help protect your data on your HP notebook.

#### Built to conserve

HP is committed to protecting the environment. The HP 3125 incorporates select materials and features configurations that help reduce the impact on the environment. The HP 3125 notebook PC is EPEAT Silver registered in the U.S. and is ENERGY STAR® qualified.

## SPECIFICATIONS

two integrated  
stereo speakers

1. This system requires a separately purchased 64-bit operating system and 64-bit software products to take advantage of the 64-bit processing capabilities of the AMD 64 processor. Given the wide range of software applications available, performance of a system including a 64-bit operating system will vary. Multi-Core is designed to improve performance of multithreaded software products and hardware-aware multitasking operating systems and may require appropriate operating system software for full benefit. Not all customers or software applications will necessarily benefit from use of this technology. This PC does not support the AMD over-clocking feature. AMD's numbering is not a measurement of clock speed.
2. For hard drives, GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to 16GB (for Windows 7) of system and up to 36GB (for Windows 8) disk is reserved for system recovery software.
3. Don't copy copyright-protected materials. Actual speeds may vary. Double Layer media compatibility will widely vary with some home DVD players and DVD-ROM drives. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 Double Sided-Version 1.0 Media.
4. 60 day trial period. Internet access required to receive updates. First update included. Subscription required for updates thereafter. This software is licensed to you by the manufacturer under the terms of its end user license agreement.
5. Service levels and response times for HP Care Packs may vary depending on geographic location. Restrictions and limitations apply. Service starts at date of hardware purchase. For details, visit [hp.com/go/carepack](http://hp.com/go/carepack).
6. Sold separately or as an optional feature.
7. Not all features are available in all editions of Windows 8. Systems may require upgraded and/or separately purchased hardware, drivers and/or software to take full advantage of Windows 8 functionality. See [microsoft.com](http://microsoft.com).
8. As HD DVD is a new format containing new technologies, certain disc, digital connection, compatibility and/or performance issues may arise, and do not constitute defects in the product. Flawless playback on all systems is not guaranteed. In order for some HD-DVD titles to play, they may require an HDMI digital connection and your display may require HDCP support. Blu-ray disks cannot be played on this drive. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 GB Double Sided – Version 1.0 media. Actual speeds may vary. Don't copy copyright-protected materials. Double Layer discs can store more data than single layer discs; discs burned with this drive may not be compatible with many existing single-layer DVD drives and players.
9. Wireless use requires separately purchased service contract. Check with your local vendor for coverage area and availability in your area. Connection and speeds will vary due to location, environment, network conditions, and other factors.
10. Wireless access point and Internet service required and sold separately. Availability of public wireless access points limited.
11. Weight will vary by configuration.
12. HD content required to view HD image.
13. Internet access required.
14. Testing conducted by HP consisting of full battery discharge while running a series of productivity scripts against the following applications (which may or may not be included with your particular product): Adobe® Acrobat Reader 7.0, Adobe® Illustrator® CS2, Adobe® Photoshop® CS2, Apple® QuickTime 7.1, Intervideo® WinDVD® 8, Macromedia® Flash 8, Microsoft® Office® 2003 Pro, Microsoft® Project 2003, and WinZip® 10.0. Prior to testing, the system was fully charged and set to display brightness of 60 nits, auto dim disabled, wireless off, suspend and hibernate disabled and all other programs, utilities, and services not essential to running the computer system or battery life test. Battery life will vary depending on the product model, configuration, loaded applications, features, use, wireless functionality and power management settings. The maximum capacity of the battery will naturally decrease with time and usage.
15. Dual Channel is only supported when the system is configured with DDR2 symmetric memory (i.e. 2x256).
16. Maximum memory capacities require Windows 64-bit operating systems or Linux. With Windows 32-bit operating systems, memory above 3 GB may not all be available due to system resource requirements.
17. The Computrace Agent is shipped turned off and must be activated by customers when they purchase a subscription. Subscriptions can be purchased for terms ranging from one to five years. Service is limited, check with Absolute Software for service availability outside of North America. The Absolute Recovery Guarantee is a limited warranty. Certain conditions apply. Data Delete is an optional service provided by Absolute Software. If utilized, the Recovery Guarantee is null and void. In order to use the Data Delete service, customers must first sign a Pre-Authorization agreement and then purchase one or more RSA SecurID tokens from Absolute Software. For more information, visit [absolute.com](http://absolute.com).
18. System may require upgraded and/or separately purchased hardware to take full advantage of Windows 7 functionality. Not all features are in all editions of Windows 7. See [microsoft.com/windows/windows-7/](http://microsoft.com/windows/windows-7/) for details.
