

ARCHOS | 35 VISION

The ARCHOS 35 vision is the best compromise between video and a great portability. With a powerful processor able to play high definition videos up to 1080p resolution and a form factor slightly bigger than a credit card, you can easily see its advantages.

- High definition video decoding up to 1080p resolution
- HDMI video output to play back HD video on your TV¹
- Bright 3.5" touchscreen with crisp resolution
- 8 GB² internal storage and micro SD card slot
- Compatible with MP3, WAV, OGG, FLAC, and APE music files
- Store thousands of JPEG, GIF, PNG and BMP photos
- Record voice memos thanks to the built-in microphone

Great mobile video experience

The ARCHOS 35 vision provides amazing portability for a mobile video device. At less than 10 cm long and with a 3.5" touch screen, it is easily handled and fits perfectly inside your pocket.

What else? Oh yeah, it plays 1080p resolution videos as well.

Not bad for your living room either

Being able to play HD video on the go is just great, but what would you think of high definition on your HD TV? The ARCHOS 35 vision can play back the same definition on a TV 10 times bigger than its own screen. What performance! And if you're thinking the 8 GB² of internal memory won't be enough to store several movies on it, well we've added a micro SD card slot so you can triple its storage capacity.

Music

The ARCHOS 35 vision also makes a convenient music player as it is able to play almost all the music formats you can have. With MP3, WAV, OGG, FLAC and APE file compatibility, it's as easy as a simple drag and drop from a computer. What easier way to fill the 8 GB¹ of internal memory and enjoy 250 hours of music right in the palm of your hand?

Photos

Re-live those special occasions and share memories with family and friends with your photos displayed on the ARCHOS 35 vision. Your photos will look crisp and bright on the 3.5" screen. And why not add a touch of atmosphere with the ability to play music while viewing your slideshows? Plug the optional HDMI cable and let the whole room enjoy your latest pictures in perfect resolution on your HD TV.

Voice recorder

Need to record an important lecture or a meeting? Or remember that special occasion? With the ARCHOS 35 vision, you can record it all.
