SAMSUNG

HM6000 BLUETOOTH® HEADSET

SPECIFICATION SHEET

POLISHED PERFORMER

What's the latest accessory that's a must-have in every fashionista's wardrobe? Here's a hint. It has an ultra-thin, sculpted metallic shell with textured nuances and smoked chrome details. Even more amazing, this sleek, elegant accessory doubles as the feature-rich HM6000 Bluetooth® headset from Samsung.

The HM6000 sounds as good as it looks. Engineered with revolutionary Samsung isolāt™ dual-mice noise canceling technology, this headset combines active sound wave generation with optimum microphone position to counter unwanted background interference. In addition to being able to hear ever nuance of the conversation, you can enjoy mono audio streaming with the HM6000. When coupled with a Bluetooth®-enabled multimedia device, the headset plays music and media through its earpiece via the supported A2DP profile.

The HM6000 is also packed with features that empower you, such as voice command and voice prompts. Answer and make calls with simple commands while the headset keeps you informed of its status. Thanks to text-to-speech capabilities offered through the FreeSync Android™ application, you can even customize a variety of handset settings, including caller ID, alarms, and more. With the HM6000, Samsung takes accessorizing to a new dimension.
