Say Goodbye to Dropped Calls

**INCREASES POWER
TO THE CELL SITE
UP TO **20 TIMES**
OVER THE CELL
PHONE ALONE**

Wilson Electronics Sleek™

The Wilson plug-and-play Sleek™ helps users reduce dropped calls, increase data rates in weak signal areas and originate calls from those dreaded "dead spots." The Sleek™ and its external vehicular antenna increases any phone's output power to the cell site while improving its ability to hear signals it normally cannot, keeping the user more reliably connected. Designed for simple set up, the Sleek™ can be easily moved from vehicle to vehicle.

Built into the Sleek™ cradle is a Wilson tried and tested bi-directional signal booster and battery charging port. The cradle is ideal for hands free operation in conjunction with a user's headset or Bluetooth device.

Wilson, in business for 42 years, has consistently led the industry in performance standards and holds a number of patents including the industry's best and most reliable method of booster cell site interference protection. Wilson's designs consistently outperform the competition in real world performance.

All Wilson products are engineered, assembled and 100% tested at the company's headquarters in St. George, Utah. Wilson products fully comply with industry guidelines for cellular devices and are FCC Type Accepted and meet Industry Canada requirements.

Features:

- **Reduces dropped calls, extends signal range, and increases data rates**
- **Built in booster amplifies signals to and from cell site**
- **Up to 20 TIMES more output power to cell site when in a vehicle**
- **Receives weak signals the phone alone may not**
- **Built-in port for battery charging**
- **Extends battery life – Booster enables phone to work at reduced power**
- **Simplifies hands free operation**
- **Installs in minutes – no special tools required**
- **Package includes everything needed -- plug-and-play**
- **Attractive, compact design**
- **Adjustable arms to fit most any phone**

Sleek™ Cell Phone Signal Booster

FEATURES

- Reduces dropped calls, extends signal range, and increases data rates
- Built in booster amplifies signals to and from cell site
- Up to 20 TIMES more output power to cell site when in a vehicle
- Receives weak signals the phone alone may not
- Built-in battery charging port
- Extends battery life – Booster enables phone to work at reduced power
- Adjustable arms to fit any phone
- Simplifies hands free operation
- Installs in minutes – no special tools required
- Package includes everything needed -- plug-and-play
- Attractive, compact design

SPECIFICATIONS

Part Number	815226
Frequency	824-894 MHz / 1850-1990 MHz
Gain	20 dB
Max Output Power	1.82 W or 32.6 dBm
Noise Figure	3.0 dB nominal
Flatness	±4 dB
Isolation	> 40 dB
Power Requirements	5V
Connectors	SMA Female
Dimensions	2.25 x 4.25 x 2.5 (inch) 5 x 9.5 x 5.6 (cm)
Weight	2.5 (oz) / 0.07 (kg)

KIT

Wilson's new Sleek™ improves both voice and data performance on the road. With 20 times the power to the cell site of a cell phone alone, it features a built-in antenna, battery charging port and works with Cellular (800 MHz) and PCS (1900 MHz) frequencies.

The Wilson Electronics' Sleek booster kit includes:

- Sleek™ all in one cradle combo: booster/charger
- Outside vehicle mini magnet-mount antenna
- Cigarette lighter power adapter*
- Installation guide

*Use only with supplied cigarette lighter power supply
