- Call Waiting Caller ID²

Panasonic ideas for life

KX-TG4225N

Expandable Digital Cordless Answering System with 5 Handsets

DECT 6.0 Plus Technology

DECT 6.0 PLUS takes the superb sound quality and outstanding range of DECT 6.0 phones to a whole new level. By increasing the frequency of error correction up to 80x, the transmission quality is improved and the phone's range is extended.

Compact Base Unit

The space-saving base unit on the KX-TG4220 series phones make them a perfect fit on a desk or counter top where space is at a premium.

Easy-to-use Big Buttons on Handset & Base

The KX-TG4220 series features a large buttons, clear buttons that make accurate dialing a breeze. No more fumbling to find the right key, and no more dialing the wrong number.

Intelligent Eco Mode

This feature automatically lowers the power consumption when you're using the handset close to the base unit. Not only does it extend the available talk time, it's good for the environment. When less power is used by the handset to communicate with the base unit, battery life is prolonged which results in less frequent charging and can result in fewer batteries in landfills.

Expandable up to 6 Handsets

Expand your phone system by adding additional handsets to any room where a phone would come in handy. You don't need a phone jack for each additional handset—just a nearby electrical outlet so there's no messy wiring or complicated setup.

Call Waiting Caller ID

The LCD displays the name and number of incoming callers even when you're on another call. It also saves up to 50 incoming calls for easy retrieval and direct callback.
