

Dual Induction Charge Station for Wii™ Remote & DSi/DSi™ XL

Wi-BNCWD

for **Wii™**
DSi™ & DSi™ XL

**INDUCTION
CHARGER**

Simply place your
DSi/DSi XL on the
pad to recharge.
No wires!

**Wii Remotes, Wii Motion Plus
and DSi not included*

Forget the small fortune you're spending on batteries, or the annoying knot of wires that you have to keep untangling, power up your Wii controllers and DSi/DSi XL using non-contact induction charging technology. Using the Dual Induction Charge Station from CTA Digital you just place up to 2 Wii remotes (with or without Motion Plus adapters connected) on the magnetic charging cradles and place your DSi/DSi XL system on the charging pad below and you're good to go. The LED lights let you know when your charge is complete, and the stand keeps you organized in style. While other chargers typically require you to keep your controllers plugged into the system, and manage cords that only get in the way, the Dual Induction Station from CTA Digital makes all that a thing of the past.

Specifications:

- LED lights illuminate blue while charging
- LED lights will be off when fully charged
- Powered by AC adapter
- Battery Type: 900mAh Rechargeable

Features:

- Charge up to 2 remotes at once
