

WD Elements™ Play™

Multimedia Drive

Store your media collection and play it on your HDTV

- High capacity all-in-one media player
- Full-HD video playback and navigation
- Play a wide variety of file formats

WD Elements Play is a media player with a built-in hard drive. It's designed for value-conscious movie buffs who want to store their media collection in one place for playback in Full-HD 1080p on their TV.

PUT YOUR LIFE ON IT®

WD Elements Play

Multimedia Drive

Product Features

Full-HD 1080p resolution

Experience spectacular Full-HD video picture quality and crystal-clear DTS 2.0 digital audio.

Plenty of room for your media collection

The built-in high capacity hard drive offers room for tons of media.

Supports a wide variety of file formats

Most popular formats are supported including RMVB, H264, and MKV.

Camera compatible

Connect your digital camera or camcorder and play or transfer content from your camera to the drive.

Automatic play

Set the player to play a selected media file automatically when the unit is turned on. Perfect for living art on your HDTV or for digital signage.

Easy, intuitive user interface

Simple, intuitive and beautiful, the user interface provides the following navigation options:

- DVD navigation with complete menu navigation, chapter listings, special features, and subtitles.
- Photo slideshow with unique transitions and music on your HDTV.
- Supports photo thumbnails, video cover art and music album art.
- Music playlist support for PLS, M3U, WPL file types.
- Preview your video during navigation.
- Multi-language subtitle support for video playback.

Composite video connection

Composite (RCA) outputs ensure compatibility with virtually all television sets.

Digital optical audio

High fidelity audio or pass-through digital audio signal to your AV receiver for surround sound experience. Supports SPDIF and Dolby Digital native playback.

Media formats

AVI (Xvid, AVC, MPEG1/2/4), MPG/MPEG, VOB/ISO, MP4/MOV (MPEG4, h.264), MKV (h.264, x.264, AVC, MPEG1/2/4), TS/TP/M2TS (MPEG 1/2/4, AVC), FLV (D1 resolution only), RM or RMVB 8/9/10

As used for storage capacity, one megabyte (MB) = one million bytes, one gigabyte (GB) = one billion bytes, and one terabyte (TB) = one trillion bytes. Total accessible capacity varies depending on operating environment. As used for transfer rate or interface, megabyte per second (MB/s) = one million bytes per second, and gigabit per second (Gb/s) = one billion bits per second.
