

Wireless, Wired Pan-Tilt IP Surveillance Camera with Night Vision and Two-Way Audio

View live video and audio right from your
smartphone or tablet

Overview:

The Wireless, Wired Pan-Tilt IP Surveillance Camera with Night Vision and Two-Way Audio is designed to deliver live audio and video right to your smartphone or tablet. Have confidence in knowing that your home or business is protected. Enjoy the convenience and precision of mobile control anytime and anywhere with the ultra-smooth rotating and elevating functionality along with integrated night vision, motion detection and two way real time audio communication with the built-in microphone and speaker.

Whether you are informing intruders that the police are coming, shutting down an unauthorized party thrown by your teenagers, or checking in on your sleeping baby, the IP Surveillance Camera is a powerful, practical and efficient tool to keep your family, home or business safe 24/7.

Features:

- Remote video and audio monitoring via wired or wireless WiFi network from any smartphone or tablet
- Compatible with iOS and Android and all standard browsers
- Integrated motion detection with 10 Infrared LEDs for night vision (covers a 30-foot area)
- Remotely control pan / tilt with a swipe off your finger (Pan: 255°; Tilt: 270°)
- Easy installation with the free View Anytime app from iTunes store or Google Play store
- Supports up to 8 cameras per app
- Supports streaming to 4 different viewing devices simultaneously
- Camera records video directly to a Micro SD Card (up to 64GB)
- Capture photos directly to the View Anytime app gallery
- Two way real time audio communication with the built-in microphone and speaker
- Wi-Fi compliant (IEEE 802.11 b/g/n), supports WEP & WPA WPA2 password encryption
- Limited 1 Year Warranty

Monitor What Matters Most

With dozens of applications, the IP Camera is an inexpensive way to watch over your home, business or anything that is most important to you. Have peace of mind knowing that you are able to protect your home or business with its 24/7 monitoring features including integrated motion detection, night vision and two way real time audio.

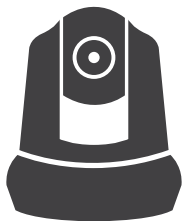

Sharp Imagery from Different Angles

Bring clear video to your smartphone or tablet anywhere there is an internet connection. The IP Camera allows for full remote control with sharp imagery so you can swiftly scan an area with the swipe of a finger across your device's screen. Insert a Micro SD Card into the IP Camera and save recorded videos directly to the card. Adjust video settings for quality, orientation, environment, motion detection and recording modes.

View Anytime Application

Simply connect the IP camera to your wired or wireless WiFi network. Download the free *View Anytime* app from iTunes or Google Play stores to record live video and audio streaming to 4 different viewing devices at the same time. The installation is very quick and easy! After installing the app, simply scan the user ID that is on the camera with your device, and enter the default password (customizable after connection). Supports up to 8 cameras per app for full access to start monitoring anytime, anywhere!
