

RVKIT - ROUND DISH RVKIT18

The Directv HD Satellite dish RV tripod kit from Installer Oasis is the perfect cost effective solution for taking your Directv satellite service with you on the road. If HDTV is what you're after while traveling, this is the ticket. The kit comes with everything you need to get your satellite TV service on the road. All you need is your satellite receiver, your TV, and 120V power and you'll be ready to watch TV.Please note: This product is harder to point than an older style Directv 18 round satelltie dish. Reason being that this dish receives up to 5 satellite at once. If you don't need HDTV on the road, we suggest looking at getting a DTV18SKIT. This dish will work on any Directv receiver, including HD receivers. It just won't receive HD channels.

A traveling kit used to take your DIRECTV® service on the road with your traveling RV. The kit includes an 18" round dish, a 3' tripod, and 50' of RG6 coaxial cable.
