

UNI-DIRECTIONAL ANTENNAS

91XG UNI-DIRECTIONAL ANTENNA

The 91XG is one of the highest gain UHF antennas made. This high performance UHF antenna has a higher gain and a smaller beam angle than conventional Yagi antennas. The reflector grids create and improved front to back ratio with shorter construction while the 91 elements truly make it one of the highest gain UHF antennas available.

91XG

- SKU# - UE-MX91
- Description - Extreme Range Uni-Directional UHF DTV Antenna
- Beam width: 24-42 degrees
- Range: 50-70 miles
- Gain: Max 15.7 dBi
- VSWR: 3.0 dBi
- Front to back ratio: Max 42 dB
- Size assembled 22"H x 20"W x 93"D
- Lifetime Warranty
- MSRP - \$119.99
