

CLEARSTREAM™ ANTENNAS

CLEARSTREAM™ 1

CONVERTIBLE

The ClearStream™ 1 Convertible medium range antenna offers the power and efficiency normally found in antennas up to 10 times its size.

It utilizes the patented ClearStream™ Tapered Loop Technology that has brought the first new and superior antenna design to the market in decades. This advanced technology allows the ClearStream™ line of antennas to be smaller and more powerful across today's DTV spectrum. Using anodized aluminum, ClearStream™ antennas are engineered for strength and durability.

The ClearStream™ 1 Convertible (C1C) offers DTV viewers the choice of using the antenna in 3 different configurations; tabletop, wall mount, or outdoors. Depending upon individual preferences and reception needs, the C1C allows for the convenience of indoor installation or the extended range provided by outdoor installation. Without the performance compromises typically seen in the outdated designs of legacy antennas, its power and efficiency are impressive. The C1C has a generous beam width of 70 degrees and outdoor range of 35 miles. With its unique integrated diplexer, the C1C actually delivers an impressive 98% of the gathered signal to the incoming cable line rather than being lost through impedance mismatches and phase cancellation. Either indoors or outdoors, the ClearStream™1 Convertible is the ideal tool for digital broadcast viewing in urban or suburban areas. No other antenna can match its performance and flexibility in such a compact size. The Antennas Direct Lifetime Warranty assures you of its superior build quality and durability.

CLEARSTREAM™ 1 CONVERTIBLE

- SKU# - C1C
- Description - Clearstream™1 Convertible Medium Range Indoor/Outdoor UHF HDTV Antenna
- Range: Up to 35 miles
- Beam width: (HorizontalPlane) 470 to 700 MHz: 70 degrees
- Gain: Max 8 dBi
- VSWR: Max 3.1
- Front to back ratio: Max 15 dB
- Size assembled 12"L x 12"W x 5"D
- 6" Coax cable included
- Lifetime Warranty
- MSRP - \$59.99
