

HP Z600 WORKSTATION

Maximum computing power in minimal space

The HP Z600 packs compute and visualization power into a small, quiet package—for the ideal workstation when every inch, watt, and decibel make a difference.

Innovation that transforms the way you work

The HP Z600's sleek new industrial design—brushed aluminum side panels, tool-less access chassis, integrated handles, and visually cable-less engineering—creates new standards for ease of service, lowered acoustics, and energy efficiency.

- Enhance your work area with HP's quietest workstation, designed to fit where space is at a premium
- Minimize power and cooling costs with ENERGY STAR® qualified configurations featuring 85% efficient power supplies and HP WattSaver which, when activated, lowers energy consumption to less than 1 Watt in off mode
- See, share, and show your work across the world with the new HP SkyRoom collaboration solution, which combines real-time 3D graphics sharing and video conferencing

Performance to help you accomplish more every minute

The HP Z600 is engineered to optimize the way processor, memory, graphics, OS and software

technology work together to deliver massive, whole-system computational power.

- Tackle bigger problems faster and process more tasks and threads in parallel with the new Intel® QuickPath Technology and new Intel® Xeon® processors¹ with integrated memory controllers.
- Get maximum I/O bandwidth and expandability from a range of Gen2 PCI Express slots and optical drives and up to 5 storage bays
- Choose the simplified HP Installer Kit for Linux installation or a breadth of Microsoft® Windows® selections
- Drive up to 8 displays with new dual graphics support and the latest NVIDIA and ATI graphics cards

Reliability derived from our legendary, confidence-inspiring quality

- Close relationships with ISVs help ensure full certification for your applications
- In-depth testing and quality assurance keep you productively up-and-running
- HP Performance Advisor helps ease configuration and updates and maximize a range of applications
- Comprehensive, lifetime HP Total Care options provide personal attention, convenient tools, and reliable service

* Windows 7 systems may require upgraded and/or separately purchased hardware and/or a DVD drive to install the Windows 7 software and take full advantage of Windows 7 functionality. See <http://www.microsoft.com/windows/windows-7/> for details.

** Certain Windows Vista product features require advanced or additional hardware. See <http://www.microsoft.com/windowsvista/getready/hardwarereqs.mspx> and <http://www.microsoft.com/windowsvista/getready/capable.mspx> for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit <http://www.windowsvista.com/upgradeadvisor>.

† Windows Vista Business disk may also be included for future upgrade if desired. To qualify for this downgrade an end user must be a business (including governmental or educational institutions) and is expected to order at least 25 customer systems with the same custom image.

¹ Quad-Core technologies are designed to improve performance of multithreaded software products and hardware-aware multitasking operating systems and may require appropriate operating system software for full benefits; check with software provider to determine suitability; Not all customers or software applications will necessarily benefit from use of these technologies.

² 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See <http://www.intel.com/info/em64t> for more information.

³ Intel's numbering is not a measurement of higher performance.

⁴ Each processor supports up to 3 channels of DDR3 memory. To realize full performance at least 1 DIMM must be inserted into each channel. To get full 6 channel support, 2 processors MUST be installed.

⁵ SATA hardware RAID is not supported on Linux systems. The Linux kernel, with built-in software RAID, provides excellent functionality and performance. It is a good alternative to hardware-based RAID. Please visit <http://h20000.www2.hp.com/bc/docs/support/SupportManual/c00060684/c00060684.pdf> for RAID capabilities with Linux.

⁶ For hard drives, 1 GB = 1 billion bytes. TB = 1 trillion bytes. Actual formatted capacity is less. Up to 8 GB of hard drive (or system disk) is reserved for the system recovery software (XP and XP Pro). Up to 12 GB of system disk is reserved for system recovery software. (Vista).

⁷ Actual speeds may vary. Does not permit copying of commercially available DVD movies or other copyright protected materials. Intended for creation and storage of your original material and other lawful uses. Double layer discs can store more data than single layer discs. However, double-layer discs burned with this drive may not be compatible with many existing single-layer DVD drives and players.

⁸ As Blu-Ray is a new format containing new technologies, certain disc, digital connection, compatibility and/or performance issues may arise, and do not constitute defects in the product. Flawless playback on all systems is not guaranteed. In order for some Blu-ray titles to play, they may require a DVI or HDMI digital connection and your display may require HDCP support. HD-DVD movies cannot be played on this workstation.

⁹ HP Care Pack Services extend service contracts beyond the standard warranties. Service starts from date of hardware purchase. To choose the right level of service for your HP product, use the HP Care Pack Services Lookup Tool at www.hp.com/go/lookuptool. Additional HP Care Pack Services information by product is available at <http://www.hp.com/go/carepack>. Service levels and response times for HP Care Packs may vary depending on your geographic location.
