

HP Compaq dc7900 Business PC Series

PCs designed to be the foundation of your business

HP recommends Windows Vista® Business.

The HP Compaq dc7900 Business Desktop PC is designed for businesses that require best-in-class lifecycle management, solutions that help keep you up and running more securely, as well as specialized designs to fit your individual needs. Plus, you can rely on the engineering experience built in so you can make the right choice and spend more time concentrating on your business success.

The latest Intel technology offerings provide advanced performance and reliability to meet your specific business need.

Protect your business.

HP Compaq dc7900 PCs help to protect your physical and intellectual properties with an enhanced assortment of security tools so you can customize your PC to fit your needs.

- Get more effective identity protection with HP ProtectTools™ security software suite, which offers an extremely powerful set of multi-factor authentication and access controls.
- Keep your users up and running while securing data with optional RAID 1 configurations.
- Reduce disruption and protect your data against corruption with HP Backup and Recovery Manager.
- Help safeguard your physical assets against theft or tampering with PC security locks and remotely manageable HP Solenoid locks.

Simplify your business.

Increase the efficiency of planning, deployment and transition of PCs with a variety of proven manageability tools, such as HP Client Manager.

- Maintain a more consistent work environment and reduce support costs with a stable software image and 15+ months of platform stability.
- Eliminate guesswork and enhance proactive planning with valuable information about product changes provided up to 60 days in advance by the HP Product Change Notification service.
- Industry standard remote management protocols including DASH 1.0 and Intel Core™ 2 Processors with vPro Technology help to increase manageability and decrease costly downtime

Fit your business.

The flexible choice for business, the HP Compaq dc7900 PC offers power-efficient options and 3 innovative form factors so you can create the PC that best fits your environment.

- Increase energy savings with up to 87% energy efficient power supplies on the dc7900e that is ENERGY STAR® qualified and EPEAT Gold registered. Make a positive impact on the environment – and your budget.
- Increase flexibility and productivity with features created for businesses like yours—so you can focus on your business success, not your PC.

Monitor sold separately.

* Certain Windows Vista product features require advanced or additional hardware. See www.microsoft.com/windowsvista/getready/hardwarereqs.mspx and www.microsoft.com/windowsvista/getready/capable.mspx for details. Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit www.windowsvista.com/upgradeadvisor.

+ Windows Vista Business disk also included for future upgrade if desired. To qualify for this downgrade an end user must be a business (including governmental or educational institutions) and is expected to order annually at least 25 customer systems with the same custom image

¹ Dual/Quad/Triple Core is a new technology designed to improve performance of multithreaded software products and hardware-aware multitasking operating systems and may require appropriate operating system software for full benefit. Not all customers or software applications will necessarily benefit from use of this technology.

² 64-bit computing on Intel architecture requires a computer system with a processor, chipset, BIOS, operating system, device drivers and applications enabled for Intel® 64 architecture. Processors will not operate (including 32-bit operation) without an Intel 64 architecture-enabled BIOS. Performance will vary depending on your hardware and software configurations. See www.intel.com/info/em64t for more information.

³ Above 3 GB, all memory may not be available due to system resource requirements.

⁴ For hard drives, GB = 1 billion bytes. Actual formatted capacity is less. Up to 8GB (for XP and XP Pro) and up to 12GB (for Vista) of system disk is reserved for recovery software.

⁵ Actual speeds may vary. Don't copy copyright-protected materials. Double Layer discs can store more data than single layer discs; discs burned with this drive may not be compatible with many existing single-layer DVD drives and players. LightScribe creates a monochrome image. LightScribe media required and sold separately.
