

Beyond the ordinary

HP Recommends Windows® 7.

HP Compaq 6005 Pro Business PC

Designed to deliver uncompromised results with energy efficiency features and high-end capabilities

Packed with high performance features, the HP Compaq 6005 Pro Business PC is energy efficient and well equipped to go beyond meeting your daily business demands. Enabled for manageability with DASH 1.1, you can also choose the productivity and security features that best suit your everyday needs with a PC designed to exceed your expectations.

Designed to deliver

Enhance your capabilities with the latest AMD Business Class technology: processors and chipset that provide exceptional performance while operating as efficiently as possible. Integrated ATI Radeon 4200 graphics with ATI Avivo™ and DirectX 10.1 provide a stunning visual experience. Dual monitor capability also comes standard for easier multi-tasking.

Use less, save more

Improve your bottom line with energy efficient features like an optional 89% energy efficient power supply, integrated side port memory, which allows the PC to go into a deep sleep at idle, and Cool'n'Quiet technology, can help you save costs by reducing energy consumption.

Easy to deploy and manage

Streamline business processes while lowering IT costs and operating expenses with DASH and other manageability features that allow for more efficient planning, deployment, and transition of your PCs. You get access to a suite of client management tools, 12+ month product lifecycle, and global SKUs to meet your world-wide needs.

Simplified serviceability comes in the form of tool-less hood removal, drive bays and slots as well as internal quick release latches, green pull tabs, and color coordinated cables and connectors.

Security that's right for you

Help your investments be more secure with the embedded TPM 1.2 security chip that helps provide enhanced data protection and limits system access through hardware-based encryption. HP SmartCover solenoid hood lock and sensor provide a new layer of chassis security. Add HP ProtectTools modules to further enhance your first line of defense.

Deploy a PC that helps promote energy efficiency, delivers advanced visual productivity, and provides headroom for future technology expansion – With the HP Compaq 6005 Pro Business PC, the only thing you won't experience is compromise.

HP Compaq 6005 Pro Business PC

HP Recommends Windows® 7.

*Certain Windows Vista product features require advanced or additional hardware. See

www.microsoft.com/windowsvista/getready/hardwarereqs.mspx and www.microsoft.com/windowsvista/getready/capable.mspx for details.

Windows Vista Upgrade Advisor can help you determine which features of Windows Vista will run on your computer. To download the tool, visit www.windowsvista.com/upgradeadvisor.

**This system may require upgraded and/or separately purchased hardware and/or a DVD drive to install the Windows 7 software and take full advantage of Windows 7 functionality. See <http://www.microsoft.com/windows/windows-7/> for details

***Windows Vista Business disk also included for future upgrade if desired. To qualify for this downgrade an end user must be a business (including governmental or educational institutions) and is expected to order annually at least 25 customer systems with the same custom image.

****Windows 7 Business may be included for future upgrade if desired. To qualify for this downgrade an end user must be a business (including governmental or educational institutions) and is expected to order at least 25 customer systems with the same custom image.

1. This system requires a separately purchased 64-bit operating system and 64-bit software products to take advantage of the 64-bit processing capabilities of the AMD 64 processor. Given the wide range of software applications available, performance of a system including a 64-bit operating system will vary. Dual/Quad/Triple Core is designed to improve performance of multithreaded software products and hardware-aware multitasking operating systems and may require appropriate operating system software for full benefit. Not all customers or software applications will necessarily benefit from use of this technology. This PC does not support the AMD over-clocking feature.
2. For hard drives, GB = 1 billion bytes. Actual formatted capacity is less. Up to 8GB (for XP and XP Pro), up to 10 GB (for Vista) and up to 16 GB (for Windows 7) of disk space is reserved for the system recovery software.
3. Don't copy copyright-protected materials. Actual speeds may vary. Double Layer is a new technology. Double Layer media compatibility will widely vary with some home DVD players and DVD-ROM drives. Note that DVD-RAM cannot read or write to 2.6GB Single Sided/5.2 Double Sided-Version 1 Media. Blu-Ray is a new format containing new technologies; certain disc, digital connection, compatibility and/or performance issues may arise, and do not constitute defects in the product. Flawless playback on all systems is not guaranteed. In order for some Blu-ray titles to play, they may require a DVI or HDMI digital connection and your display may require HDCP support. HD-DVD movies cannot be played on this Desktop PC. High Definition content required to view HD images.
4. DirectX® 10 requires Windows Vista. Windows 7 will support older DirectX 9 adapters using a WDDM v1.0 (Vista) driver. DirectX 10 requires a WDDM v1.1 (Windows 7) compliant driver.
5. Service levels and response times for HP Care Packs may vary depending on geographic location. Restrictions and limitations apply. Service starts at date of hardware purchase. For details, visit www.hp.com/go/carepack.
