

PixelPure 3G™ - This advanced third-generation digital video processing system is capable of producing 4,096 levels of gradation for a smooth, natural-looking picture without image banding.

DynaLight™ - DynaLight™ monitors the brightness level of each video frame, and automatically adjusts the backlight intensity based on the image content. Precise signal analysis affords 256 levels of backlight intensity. This creates dynamic contrast up to 5X that of the original panel contrast, resulting in a deeper black level that increases detail and depth, even in low light environments.

CineSpeed™ - CineSpeed™ LCD panels have the 8ms or faster response speed necessary for cleaner high-action home theater images. A wide 176 degree viewing angle ensures that you'll have the best seat in the house.

Gloss Black Cabinetry - New gloss black cosmetics complement the set and incorporate the slim SoundStrip™ speaker system, for rich full sound from a compact cabinet.

37HL67 SPECIFICATIONS

Video

Display Resolution	720p (1366x768)
