

shown on optional stand ST6587

1080p Full HD Display - With Full HD, there's no need to scale down a 1080 signal. With twice the pixel resolution of 720p HD models, Full HD creates the pinnacle in picture quality.

XtremeBLAC™ - By increasing black levels by up to 75%, this system doubles the contrast of our TALEN™ XHD models for deeper, more three-dimensional images.

TALEN™ Toshiba Advanced Light Engine - Utilizing DLP® chip technology from Texas Instruments, and advanced optics, Toshiba micro-display projection TVs bring home the quality of the big theater screen experience.

Radiance 150™ - The Radiance 150™ lamp produces bright, clear images. The set also has a Quick Restart™ feature, ensuring you won't have to wait to enjoy the show.

Audio Enhancements - SRS® WOW™, Dolby® Digital, and Dolby® Digital Dynamic Range Control provide superior sound quality.

Convenience Suite - Convenience features include Channel Browser™, Favorite Browser™, Channel and Input labeling, and even a feature that turns the TV off if you fall asleep and the signal turns to "snow".
