

2GIG Image Sensor

SKU: 2GIG-IMAGE1
UPC: 8-17082-01053-3

2GIG Technologies is pleased to announce the availability of the new 2GIG Image Sensor powered by Alarm.com. The Image Sensor is an exciting product that combines the capabilities of a wireless PIR (passive infrared) motion sensor and a digital still camera. With the Image Sensor you can offer traditional motion detection combined with visual confirmation of why the motion sensor was activated.

FEATURES

PIR MOTION DETECTION

- ETL certified for UL 639
- Wireless connectivity for easy installation
- Configurable PIR sensitivity including pet immunity

IMAGE CAPTURE

- Resolution: 320x240 (QVGA)
- Color camera
- Night vision w/IR illumination
 - Black and white
- Receive email or MMS alerts with images attached

PRICING

Contact your 2GIG Distributor or Sales Representative for pricing details.

PRODUCT AVAILABILITY, ORDERING AND SHIPPING INFORMATION

Orders for the Image Sensor will be accepted starting June 1. The estimated date dealers can order from distributors is June 8. Dealers should check availability with distributors.

SYSTEM REQUIREMENTS

The Image Sensor requires the following:

- 2GIG Go!Control security panel
- **Firmware 1.10 or higher**
- XCVR2 900MHz Transceiver
- Image Sensor Service Plan with Alarm.com

WARRANTY

The Image Sensor ships with a standard 1 year limited warranty. Please refer to the Install Guide for specific warranty details.

FREQUENTLY ASKED QUESTIONS

Q. How does the Image Sensor benefit the customer?

A. In addition to acting like a standard motion detector, the Image Sensor will also capture motion-activated images when the panel is armed away, in alarm or based on custom schedules created by the user. This allows the customer to see what is happening through their motion detector

Q. How many images can a customer upload each month?

A. The customer can upload up to 140 images to Alarm.com each month depending on the Image Sensor Plan that the customer enrolls in. Please contact Alarm.com for additional information.

Q. Can the customer see the uploaded images on their mobile devices?

A. Yes. The customer can see the images captured using the Alarm.com app on their mobile device. Images can also be sent via email, MMS, or push notification alerts.

Q. Do I have to wait for an event to happen or can I check at any time to see what is happening in my home?

A. The Image Sensor lets you initiate a Peek-In at any time that will provide an image on demand or next time the sensor detects motion.

Q. What firmware version is required for the Image Sensor?

A. Go!Control panels must be updated to version 1.10 or higher.
