

Antec®

KÜHLER H₂O 650
KÜHLER H₂O SERIES

ACCESSORIES

Next Generation Maximum Performance Liquid CPU Cooling System
Quick Install | Zero-Maintenance™

The Antec KÜHLER H₂O 650 delivers high-performance liquid cooling for your CPU in a quick, easy-to-install package. Unlike traditional liquid cooling systems, this self-contained unit comes prefilled and requires no maintenance. The extra large pump circulates coolant through optimized water channels, while easy-bend flexible tubing allows the KÜHLER H₂O 650 to be installed in nearly any orientation. In addition to easy installation, a powerful PWM fan pushes air through directional blades and channels it through the radiator for optimal cooling. Included in the box is an air duct that reduces static pressure which in turn, allows air to flow out of the case efficiently. Lastly, integrated firmware automatically adjusts fan speed and changes the RGB LED based on temperature. Engineered for maximum performance, the Antec KÜHLER H₂O 650 delivers liquid cooling performance at an air cooling price.

KÜHLER H₂O 650

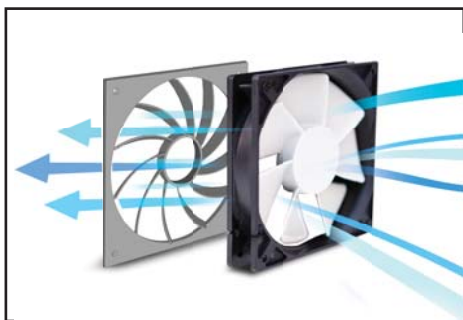

KÜHLER H₂O SERIES

Copper cold plate is optimized for thermal conduction

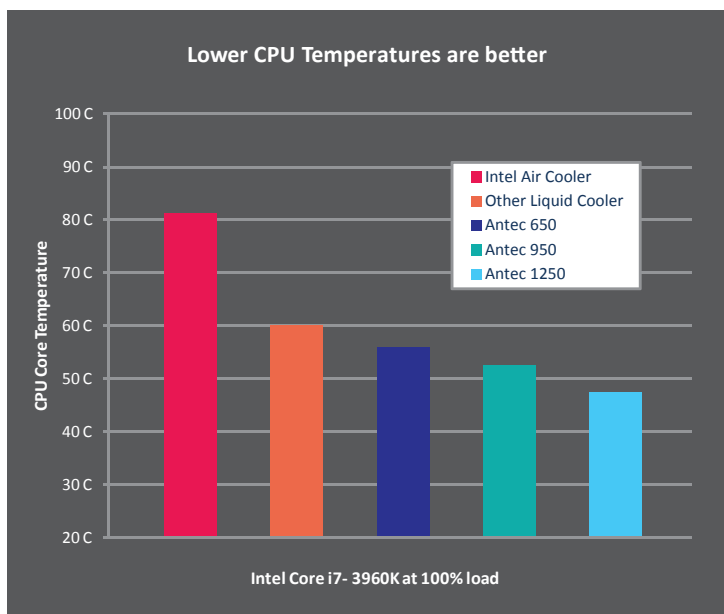

Extra large pump and integrated PWM fan were engineered to cool the radiator efficiently

One Integrated PWM fan automatically adjust fan speed based on temperature. Built-in directional blades focus airflow through the radiator

RGB LED illuminates your case and changes color to indicate CPU temperature

Fan Speed	600 – 2400 RPM
Radiator Dimensions	159 mm x 120 mm x 27 mm / 6.3" x 4.7" x 1.0"
Fan Dimensions	120 mm x 25 mm / 4.7" x 1.0"
Cold Plate + Pump Height	1.0" / 26 mm
Tubing Length	11.8" / 300 mm
Cooling Liquid	Safe, environmentally-friendly, anti-corrosive
Net Weight	2.2 lbs / 1.0 kg
CPU Socket Compatibility	Intel LGA 775, 1150, 1155, 1156, 1366, 2011 AMD AM2, AM2+, AM3, AM3+, FM1, FM2
Warranty	3 years

UPC#: 0-761345-77185-6
