

BELKIN®

Switch2

Two computers.
One monitor.
No problem.

USB

BELKIN®

Switch2

Two computers. One monitor.
No problem.

Something old. Something new. Half the space.

Keep your old computer for access to your financial records, games, email, and more. Use your new monitor for both computers. Switch2 eliminates the clutter of multiple PCs—by letting you use one monitor, keyboard, and mouse for both computers.

Click and Switch.

Place the remote anywhere on your desk. Press the button to switch from one computer to the next. Simple. With no commands to remember or key combinations to forget, Switch2 can be used by anyone, from web-savvy kids to bewildered adults.

Plug in. Turn on.

Switch2 installs in three easy steps, using the included cables. No software is required. The cables and base stay behind your computers, keeping your desktop free of clutter.

Package Includes
