Brother® QL-570VM Visitor Badge & Management Kit

Help streamline visitor check-in and enhance building security.

Now it's easy – and affordable – to present a professional, security-concious image while also keeping track of visitors to your office, school, seminar or event.

The Brother QL-570VM Visitor Badge and Management Kit puts timely visitor log-in, professional badge creation and efficient report generation within the reach of practically any organization.

If you are still using a paper log to track visitors and need a better way to manage your entry/exit data – this could be the right solution for you. This database driven software offers powerful badge-making tools and the ability to capture relevant information to generate security logs and print on-demand emergency evacuation reports – with just a few clicks.

A complete solution.

The Brother QL-570VM Visitor Badge and Management Kit is a complete solution – right out of the box. It's also easy to set up and use. You'll be ready to start making badges and managing visitors in minutes, while helping visitors and employees feel safer. Includes everything you need to get started:

It's the fastest, easiest way to make professional badges for:

- Visitors to your office
- Trade shows
- School visitors
- Seminar and workshop attendees
- Part-time and temp workers
- Contract employees and vendors
- Parking permits
- School hall passes
- Event tickets / admission

And so much more!

Brother QL-570 Label Printer

Connects via included USB cable to your PC

12 badge holders and lanyards to get started

Two rolls of DK-N5224 Continuous Non-Adhesive badge stock

Prints visitor badges fast – in crisp high-resolution (up to 300 x 600dpi!)

Full-featured VM-100 Visitor Badge and Management software, and P-touch® Editor 5.0 label design software on CD

* Also prints a wide variety of other pre-sized, self-adhesive DK labels and tapes† for general office use, up to 2.4" wide.

† Additional purchase required.

Powerful, user-friendly software.

The robust software can handle an array of visitor badge and tracking requirements – from generating customer badges to logging your visitors into the database and producing reports.
Some of the software features include:

- Enter visitor information as they arrive
- Self check-in mode for visitors to issue their own badge upon arrival
- Sign-in/Sign-out capabilities to track when visitors arrive and depart
- Enter volunteers, substitute teachers, or any other visitor information in advance and pre-register your guests
- Ability to include a message for a visitor that prints when badge prints
- Expedite badge processing by recalling information from past visits
- Badge preview capabilities to check accuracy before printing
- Issue a Parking Permit badge
- Display or print an emergency evacuation report
- Visitor list database storage and automatic back up
- Host database for receptionist to easily select the name and information of person (host) visitor is meeting

It's a professional solution – full-featured and versatile.

The VM-100 Visitor Badge and Management software provides the templates to create and print tailor-made badges, as well as the database program to store, recall and query visitor records. The included P-touch® Editor software extends your design options, enabling you to import logos and other graphics into your badge, and manipulate type styles, fonts and sizes. Customize your badges to include only the information you need – which helps your receptionist and visitors save lots of time. In addition to printing visitor badges, users can also print a wide variety of other pre-sized, self-adhesive DK labels and tapes[†], for general office use, when used with the P-touch® Editor software.

It's fast. It's easy. And the results are professional every time.

Simply install the software from the CD – it includes both the label design and visitor management software.

Then connect your Brother QL-570 label printer to your PC, and insert one of the easy drop-in rolls of non-adhesive badge stock.

Use the software's pre-designed templates to get started. Easily add elements from your PC to create a custom-designed badge. When done, the Brother QL-570 automatically prints and cuts your badges to the right length.

Two visitor check-in modes.

The Brother QL-570VM Visitor Badge and Management Kit is designed for the two most common ways organizations handle visitors:

Reception mode

For assisted check-in used by most organizations. Visitors arrive and someone on your staff – typically at the front desk or reception area – enters their data to generate a badge.

Self Check-in mode

For unassisted check-in, ideal for trade shows and events. In this mode, the visitor enters their data into a pre-designed screen and a badge is automatically generated.

In both modes, visitor information is logged into a database so you can generate reports for security or other management needs.

# The Brother QL-570VM Visitor Badge & Management Kit

At a glance …
