Copy speed is the average of FCOT, ISO/IEC 24735 Annex D. See www.usa.canon.com/ipm for additional details.
- Photo print speeds are based on the standard mode driver setting using photo test pattern(s) and select Canon Photo Paper. Print speed is measured as soon as first page begins to feed into printer and will vary depending on system configuration, interface, software, document complexity, print mode, type of paper used, and page coverage. See www.usa.canon.com/printspeed for additional information.
- Resolution may vary based on printer driver setting. Color ink droplets can be placed with a horizontal pitch of 1/4800 inch at minimum.
