

*Think Cavalry for quality, performance and value.*

There are a myriad of 3.5" external hard drives on the market and our Cavalry product experts are familiar with all of them. However this one is exciting! What turned their heads about this Cavalry External enclosure with High Speed USB 2.0 interface was its remarkable set of features.

All Cavalry Hard Drives are Pre-Formatted using FAT 32 for quick plug and play and compatibility between Windows and Mac OS with its embedded MAC OS and Windows driver support.

The external hard drive boasts exceptional heat dissipation, with its phenomenal High performance embedded processor to reduce firmware over heating and built in-fan. The durable aluminum chassis offers streamlined construction and superior heat dissipation to keep the hard drive operating at a safe, cool temperature for years of use.

Its stackable design gives you a streamlined, uncluttered workplace and the hard drive's active LED read out indicates power and data access. AC adapter, driver disk for windows 200, MAC OS, USB cable is included.
