

12-CUP PROGRAMMABLE COFFEEMAKER

Get your morning coffee in a snap with this Chefman 12-cup programmable coffeemaker. With effortless programming, you can set the clock and program the 24-hour auto brew system with ease. Once the coffee starts brewing, the coffeemaker is specially designed to heat water to the optimal brewing temperature before it hits the coffee grounds to provide maximum flavor extraction. The Pause 'n Serve feature lets you pause brewing to grab your first cup before the brewing cycle ends. The coffeemaker is equipped with a 2-hour automatic shutoff feature on the nonstick Keep Hot carafe plate for added peace of mind.

All removable parts, including the filter and basket, are dishwasher-safe. Combine that with an easy-clean control panel and cleanup is a breeze.
