

TWIN2X1024-5400C4

The Twin2X1024-5400C4 is a 1024 MByte matched pair of DDR2 SDRAM DIMMs. This part delivers outstanding performance in the latest generation of dual-channel DDR2-based motherboards. It has been tested extensively in multiple DDR2 motherboards to ensure compatibility and performance at its rated speed. This memory has been verified to operate at 675MHz at the low latencies of 4-4-4-12. This module is also available in a single module part.

FEATURES

- ▶ 1024 Megabytes of DDR2 memory
 - *Two matched CM2X512-5400C4 modules*
- ▶ Implemented using 32M x 8 DDR2 SDRAMs
- ▶ 100% tested at 675MHz in high performance DDR2 motherboards
- ▶ Legendary Corsair reliability and service
- ▶ Lifetime warranty
- ▶ NVIDIA® SLI™ Ready

TEST SPECS

- ▶ Each module pair is tested together in an Intel-based motherboard at 675MHz
- ▶ Tested and packaged in pairs
 - *Packaged together immediately following system test*
- ▶ Tested at JEDEC-standard latency settings (4-4-4-12) at 1.9V
- ▶ SPD programmed at JEDEC standard 4-4-4-12 values

The Fine Print: Every part is tested in Corsair's factory at 675MHz, but your actual results may vary depending on the overclocking margin of your CPU and motherboard. Newer motherboards may be used for production test as they become available. Corsair may periodically update the part with newer RAM revisions of same or greater performance. RAM used on the module may change without notice. © June 2004 Corsair Memory, Inc.
