

CMX1024-3200C2

The CMX1024-3200C2 is a 1024 MByte DDR SDRAM DIMM designed for extreme speed and is one of the fastest 1 GByte modules available. This part delivers outstanding performance at high clock speeds. It has been tested extensively in a variety of motherboards commonly used in gaming rigs. This memory has been verified to operate at 200 MHz (DDR400) at aggressive latencies of 2-3-3-6. This module is also available in matched pairs of TwinX modules tested as a set in a dual channel DDR motherboard. .

FEATURES

- ▶ 1024 Megabytes of memory
- ▶ Dual channel testing environment
 - ➔ 200MHz Canterwood based test setup
- ▶ Benchmarked using both Athlon and Pentium test platforms
- ▶ Integrated aluminum heat spreader for improved thermal performance
- ▶ Lifetime warranty

TEST SPECIFICATIONS

- ▶ Tested at aggressive latency settings of 2-3-3-6 for all systems
 - ➔ 2-3-3-6 on all platforms
 - ➔ Test voltage: 2.75V
