**DFE-690TXD  
Fast Ethernet  
PC Card**

**DFE-530TX+  
Fast Ethernet  
PCI Adapter**

**DSL-302G  
ADSL Modem**

### VPN Features

Virtual Private Network (VPN) allows users to connect to other computers via the Internet securely. This feature is beneficial for travelers, telecommuters, and sales personnel who are on the road or away from their office and need to access sensitive information from their company's network. The DI-804HV protects user data over the Internet by creating secured tunnel connections with strong integrity and encryption algorithms.

### Firewall Features

The Web-based user interface displays a number of advanced network management features including:

#### Mac Filtering

Easily applied filtering based on MAC addresses to allow or deny computers on the network access to the Internet.

#### Network Address Translation

NAT allows you to share a single IP address and protects you from outside intruders gaining access to your private network.

### Built-in 4-Port Switch

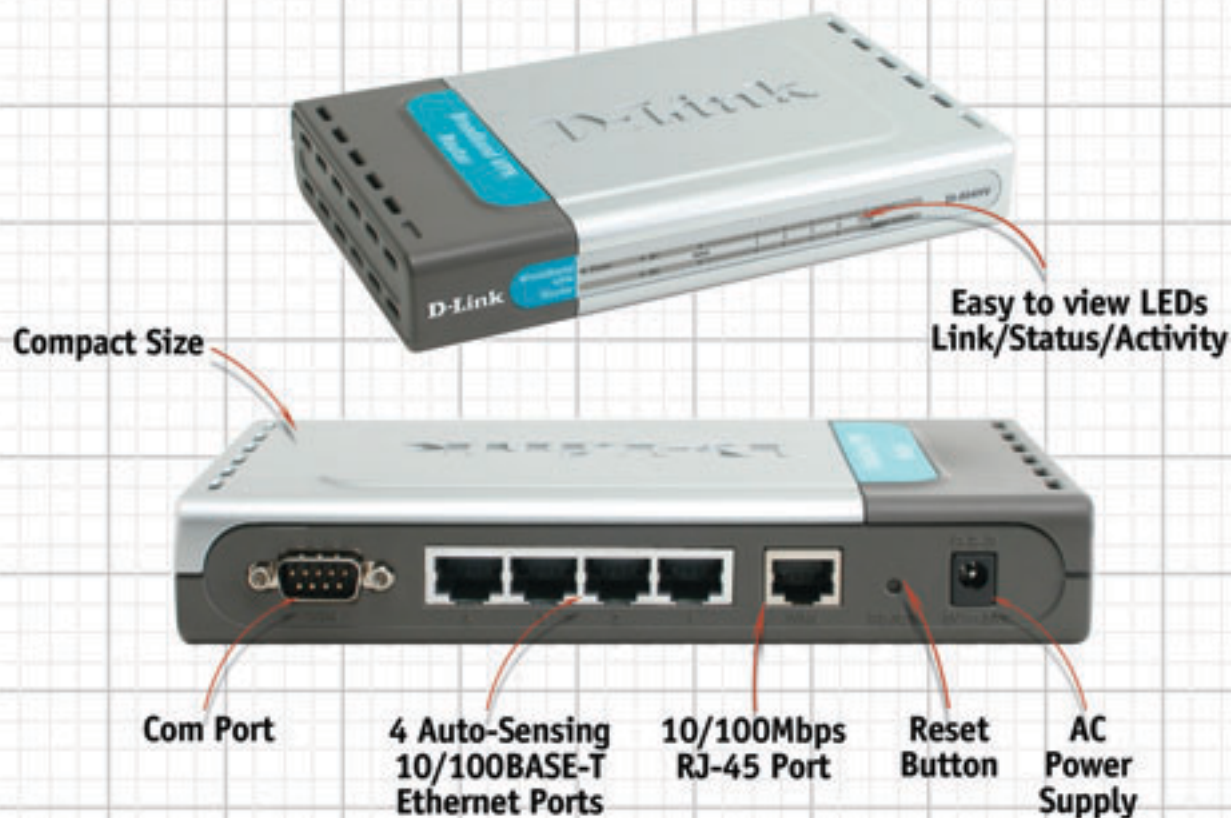

Allows you to quickly and easily share an Internet connection with multiple computers and devices. Each 10/100 Ethernet Port automatically senses and accepts the type of CAT 5 cable you attach - whether straight-through or cross-over.

### Easy Installation

The D-Link setup wizard simplifies the installation process, getting you up in minutes.

# Express EtherNetwork™ VPN Router

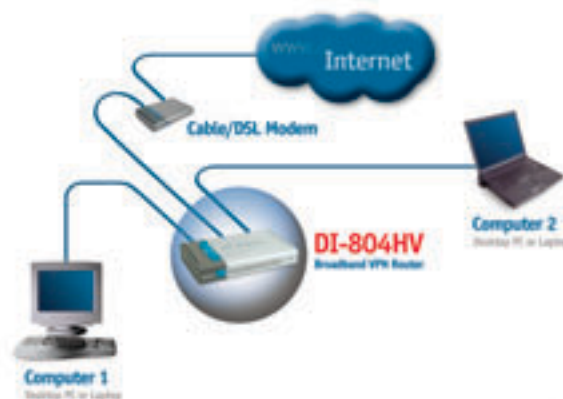

DI-804HV

The Web-based user interface makes it easy to quickly set up and configure the DI-804HV. It also displays a wide array of management settings and tools.
