¹ Draft pages per minute (ppm) speeds measured after first page, based on black text patterns in Draft Mode on plain paper. Laser quality pages per minute (ppm) speeds measured after first page, based on black text patterns in default mode on plain paper. Additional print time will vary based on system configuration, software application and page complexity. See www.epson.com/printspeed for more information about print speeds.

² Two Black cartridges allow about twice as much black printing, at about twice the speed, as compared to printing with a single Black cartridge.

³ Compared to competitive monochrome laser printers priced at \$199 or less available as of March 2008. Based on Epson testing of power estimated to be used during an eight-hour day.

⁴ Some applications and/or functions, like double-sided printing, are not supported by Mac.

[†]Ink fade resistance ratings are based on accelerated testing of prints on specialty media, displayed indoors, under glass. Actual print stability will vary according to media, printed image, display conditions, light intensity, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or properly store them. Visit www.wilhelm-research.com for the latest information.

^{††}We recommend that you use genuine Epson ink cartridges. The use of other products may affect your print quality and could result in printer damage. Cartridge yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature. For print quality, a small amount of ink remains in the cartridge after the "Replace cartridge" indicator comes on. The printer ships with full cartridges and part of the ink from the first cartridges is used for priming the printer. See www.epson.com/cartridgeinfo for more information about cartridges.
