BASIC PRODUCT MAINTENANCE AND TROUBLESHOOTING

OILING SHREDDER

FOLLOW OILING PROCEDURE BELOW AND REPEAT TWICE

*Apply oil across entry

Press forward

Shred one sheet

Press and hold forward (▷)
2-3 seconds

CAUTION *Only use a non-aerosol vegetable oil in long nozzle container such as Fellowes 35250 

- All cross-cut shredders require oil for peak performance. If not oiled, a machine may experience diminished sheet capacity, intrusive noise when shredding and could ultimately stop running. To avoid these problems, we recommend you oil your shredder each time you empty your waste bin.

CLEANING AUTO-START INFRARED SENSORS

Paper detection sensors are designed for maintenance free operation. However, on rare occasions the sensors may become blocked by paper dust causing the motor to run even if there is no paper present (Note: two paper detection sensors are located in the center of the paper entry).

TO CLEAN THE SENSORS

Turn off and unplug shredder

Lift CD flap

Locate Auto-start infrared sensor

Dip cotton swab in rubbing alcohol

Using cotton swab, wipe away any contamination from the paper sensors

PREVENTIVE MAINTENANCE AND MISCELLANEOUS TROUBLESHOOTING

- Run shredder once a day in reverse for 15 seconds to clear cutters
- Empty wastebasket when bin full indicator light is illuminated using bag # 36052
- Shredder will not function if the pull-out bin is not pushed all the way in, or if bin needs to be emptied.
- When shredding for a prolonged period of time, the motor can become warm and require a cool down period. When this occurs the overheat indicator will alert you to the problem, this model will require 20 minutes to cool down.

ACCESSORIES

Maintenance is an important part of protecting your investment. Don't forget oil and shredder bags.
