InFocus
Navigator 3 Remote Control
Model: HW-NAVIGATOR-3

Batteries: The remote uses two (2) AA batteries. Install batteries by removing the cover from the back of the remote, aligning the + and - ends of the batteries, pushing them into place, and replacing the cover.

Operation: Point the remote at the projector or at the screen (not at the video source or computer). The maximum operating distance is 30 feet (9.14m).

Buttons and controls: Refer to your projector's reference guide for details on remote functions.
- ⏻ - turns the projector on and off
- **Help*** - shows interactive help for common picture and connection problems
- **Menu** - shows the projector's menu system
- ∧ ,∨,‹ *, › * - navigate menu items and adjust settings (also can be used for controlling presentations**)
- **Select** - confirm menu choices
- **Volume** - adjusts sound level
- **Custom** - can be assigned a special function (older projectors may call this **Effect** instead)
- **Source** - switches between sources
- **Blank** - shows a blank screen instead of the source
- **Presets** - selects stored settings
- **Mute** - mutes sound
- **Auto Image** - resynchronizes the projector to the source
- **Resize** - changes the aspect ratio

Warranty
90 day limited warranty from date of purchase.
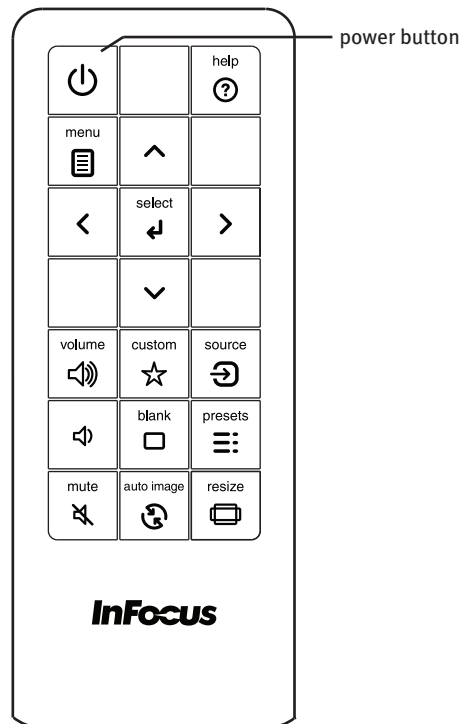

Troubleshooting
- Make sure batteries are installed in the correct orientation and are not dead.
- Make sure you're pointing the remote at the projector or screen (not at the video source or computer), and make sure you're within the remote range of 30 feet (9.14m).
- If presentation or mouse functions aren't working, make sure there is a USB or DisplayLink connection between the projector and computer. See projector reference guide for more information about USB connection.
- If Help or ‹ or › buttons aren't working, make sure your projector supports these functions (the projector must have the same buttons on its keypad and original remote).
- For online support, go to www.infocus.com/support
