Out with the old...in with the new.

DMC3-4 retrofit

The Next Generation Intercom Replacement Solution
for M&S, NuTone and most other Wire Systems.

M&S Systems is excited to announce the availability of the new DMC3-4 retrofit system. This system is designed to replace many existing 3 & 4 wire intercom systems from M&S, NuTone and others. The DMC3-4 retrofit uses the existing wiring and, in most cases, fits into existing wall cutouts with no drywall repair required. The DMC3-4 also supports the DMC1MM iPlay® dock / MP3 & CD player for whole house audio, a new stylish look and easy installation.
