

Weather Station WS-1000

MSRP \$159.00

- Virtually every weather monitoring feature included
- See-through LCD display with backlighting
- Dual external transmitters: temperature and humidity, and rainfall
- Reads Barometric pressure, temperature and humidity, rainfall, and processes this information to provide weather prediction
- Changing icons show the coming weather
- Great for gardeners

This complete weather center has every weather feature you could want, and at a great price! It is designed to look terrific and still work as a professional weather instrument. It's high styled with silver and gray accents, and a large glass see-through LCD display with backlight.

Features abound: external remote transmitters send outdoor temperature, humidity, and rainfall readings. The base station accumulates the rainfall data into daily, weekly, and seasonal rain amounts, great for knowing when extra water is needed for your plantings. Barometric readings, indoor temperature and humidity complete the station's input, allowing it to predict the coming weather and show this with various icons on the display.

Rain collector and transmitter

Temperature, humidity, and barometric pressure transmitter

The unit also features an Atomic Clock, with day & date, with alarm and snooze function. Use this as your morning alarm clock! An AC adaptor is included in the event constant backlighting is desired, as are batteries. Size approx. 9" x 8" x 4" UPC 0-11502-40602-3. Pack: 4
