Professional IT Computer/Electronic Cleaning Systems

DataVac® ballistic nylon carry bag holds and protects all system components for safe, easy transport.

Micro Tool Kit cleans minute particles of dust and debris from hard-to-reach places.

DataVac® Pro-Series models (MDV-2TCA and MDV-3TCA) are complete, professional-grade vacuum/blower and dusting systems developed specifically to keep expensive computers, printers, scanners, copiers, fax machines and other electronic office equipment, thoroughly clean and operating at peak efficiency. They are built tough in America to withstand many years of day-in/day-out professional use, yet are surprisingly affordable and quickly “pay for themselves” by effectively eliminating costly downtime caused by accumulated dust and dirt.

- **Choice of Two High-Performance Models**—with plenty of power to reach down deep and clean out even the most stubborn dust, dirt and debris
- **Integrated Toner Filter System**—is 99.9% effective on particles as small as 0.3 microns! Quickly and thoroughly cleans up messy toner spills from printers and copiers.
- **New Ballistic Nylon Carry Case**—with comfortable shoulder strap and attachment storage pockets.
- **Complete Range of Specialized Attachments**—to handle every conceivable office and IT equipment cleaning application.
- **Rugged, Heavy-Duty, All-Steel Body**—designed to withstand many years of tough professional use.
- **American Quality and Service**—Made in USA and backed by a family owned, American company in business since 1939!
